UPDATED 26 OCTOBER 2026 / TWO SAVED DEMO ACCOUNTS

Two accounts, two LMS cases

Alex Green (DEMO) / TAS-2026-0093

Saved account profile: 0%. 10-acre fictional property in Bastrop County. Alex requests selective brush management and access-route maintenance. Required request information is saved even though the broader account profile is incomplete.

https://www.tasfrl.org/lms-tour?path=alex#tour-path

Jordan Ellis (DEMO) / TAS-2026-0094

Saved account profile: 100%. 18-acre fictional property in Nacogdoches County. Jordan requests access-trail reopening, retaining the north creek buffer. Jordan has saved contact details, general land information, interests, goals and a contact preference. The complete profile and this LMS case are separate records.

https://www.tasfrl.org/lms-tour?path=jordan#tour-path

Why keep an account profile?

The profile stores general contact details, land background, interests and goals for ongoing support. Clients can keep their information in one place; TASFRL can use it for relevant follow-up, referrals and service planning.

Two separate saved paths

Alex and Jordan are different demo users with different cases. The profile percentages reflect their saved accounts. Each screenshot sequence follows that client, their property request, the assigned lead and the shared records of that case. A path never switches into the other client account or case.

What connects either account to LMS?

Saved name, email and phone can prefill About You with either completion level. General land background and interests do not automatically fill the property or access steps. Every request needs its own contact, property, goals, access and required consent information.

The same review requirements

A complete profile does not give priority, verify identity or ownership, confirm partnership benefits, approve pricing or authorize work. Both submitted requests still need staff review, appropriate agreements and operational checks. Availability, scope, funding and applicable program requirements still apply.

Reading the examples

Both accounts are reserved, verified DEMO accounts. The Jordan profile was seeded with complete fictional background for the tour; no real verification email or membership purchase was performed. These examples create no real signatures, approvals, payments or field work.

HOW TO USE THE SCREENSHOT TOUR

Choose an account, then follow its own case

Two saved cases, client and staff roles

The Alex path follows TAS-2026-0093. The Jordan path follows TAS-2026-0094. Each has separate account, request, assessment and form screenshots. Case links require the correct signed-in account and existing permissions. Public screenshots grant no account access.

Captured states and illustrative branches

Alex and Jordan retain their separate saved production demo records. Case screens are refreshed as the interface changes; earlier account-entry and original-export captures retain their own dates. Each view identifies its source path and capture time. Optional training branches do not establish completed real work.

Signing tutorial and authorization

The seven-step signing tutorial uses the production interface with fictional package data in an isolated simulation. It shows opening the package, reading each PDF, typing a name, consent and authority, confirmation, officer countersigning and completed-copy links. Simulated completion screens do not represent retained signatures. Alex and Jordan's registered DEMO cases remain unsigned. Signing and client review remain separate from entry permission and work release.

No operational actions from the tour

The registered DEMO case allows saved drafts and practice reviews without notifications. It cannot create real signatures, approvals, payments, reservations or work release. A client review does not replace an agreement or authorization. Optional aerial, pricing, incident and media examples are separate training branches.

Original PDF exports and long screens

The original TASFRL PDF exports retain their original page counts and blank signatures, with DEMO labels. Long website screenshots continue across numbered layout pages here for readability. These continuation pages do not add pages to the original forms. Open an image in the public tour to inspect its full resolution.

180 screen and PDF views across 2 separate account paths.

Alex Green (DEMO)

Saved profile completion: 0%

10-acre fictional property in Bastrop County

Alex requests selective brush management and access-route maintenance. Required request information is saved even though the broader account profile is incomplete.

Case lead: muhammad zulzidan m.. This chapter follows TAS-2026-0093. Signing tutorial images are separately labelled simulations; they do not show signed records in this case.

Profile completion is separate from request completeness and service approval. The following captures show the saved state of this account and its own case.

Our Services

Comprehensive Land Management Solutions Tailored To Your Property's Unique Needs

Brush & Understory Clearing

Removes invasive brush and understory growth to improve pasture health and overall land productivity.

Trail & Access Path Creation

Creates new trails and access paths to improve land accessibility, navigation, and property management.

Timber Stand & Pasture Improvement

Improves growth conditions for forage and trees to enhance land health and overall productivity.

Habitat & Wildlife Corridor Restoration

Restores natural habitats and establishes safe wildlife corridors to improve biodiversity and ecosystem balance.

2026-10-17T03:22:30.411Z | image part 2/3

- Mulching of invasive brush and understory vegetation
- Selective clearing to preserve healthy trees

See more

- Creation of new access trails and pathways
- Selective clearing to maintain surrounding vegetation

See more

- Improvement of pasture conditions for healthier forage growth
- Selective management of timber stands to reduce competition

See more

- Restoration of natural wildlife habitats
- Creation of safe wildlife corridors and passageways

See more

Fire Fuel Reduction & Firebreak Support

Reduces wildfire fuel loads and supports firebreaks to improve safety for land, homes, and livestock.

- Reduction of excess vegetation and wildfire fuel
- Support for firebreak creation and maintenance

See more

Trenching & Light Excavation

Provides trenching and light excavation services to support drainage, utility, and land infrastructure needs.

- Trenching for drainage and water management projects
- Light excavation for land infrastructure needs

See more

Agricultural Drone Application

Applies treatments with precision using drone technology to support targeted and efficient land improvement.

- Precision spot and broadcast application
- Targeted treatment of specific land areas

See more

Storm & Debris Response

Provides rapid debris removal and property restoration support following severe weather events.

- Removal of fallen trees and storm debris
- Clearing of blocked access paths and property areas

See more

Infrastructure Site Preparation

Prepare stable, level ground for your agricultural structures.

- Greenhouse site preparation
- Hoop house / high tunnel leveling

2026-10-23T01:13:17.243Z | image part 1/1

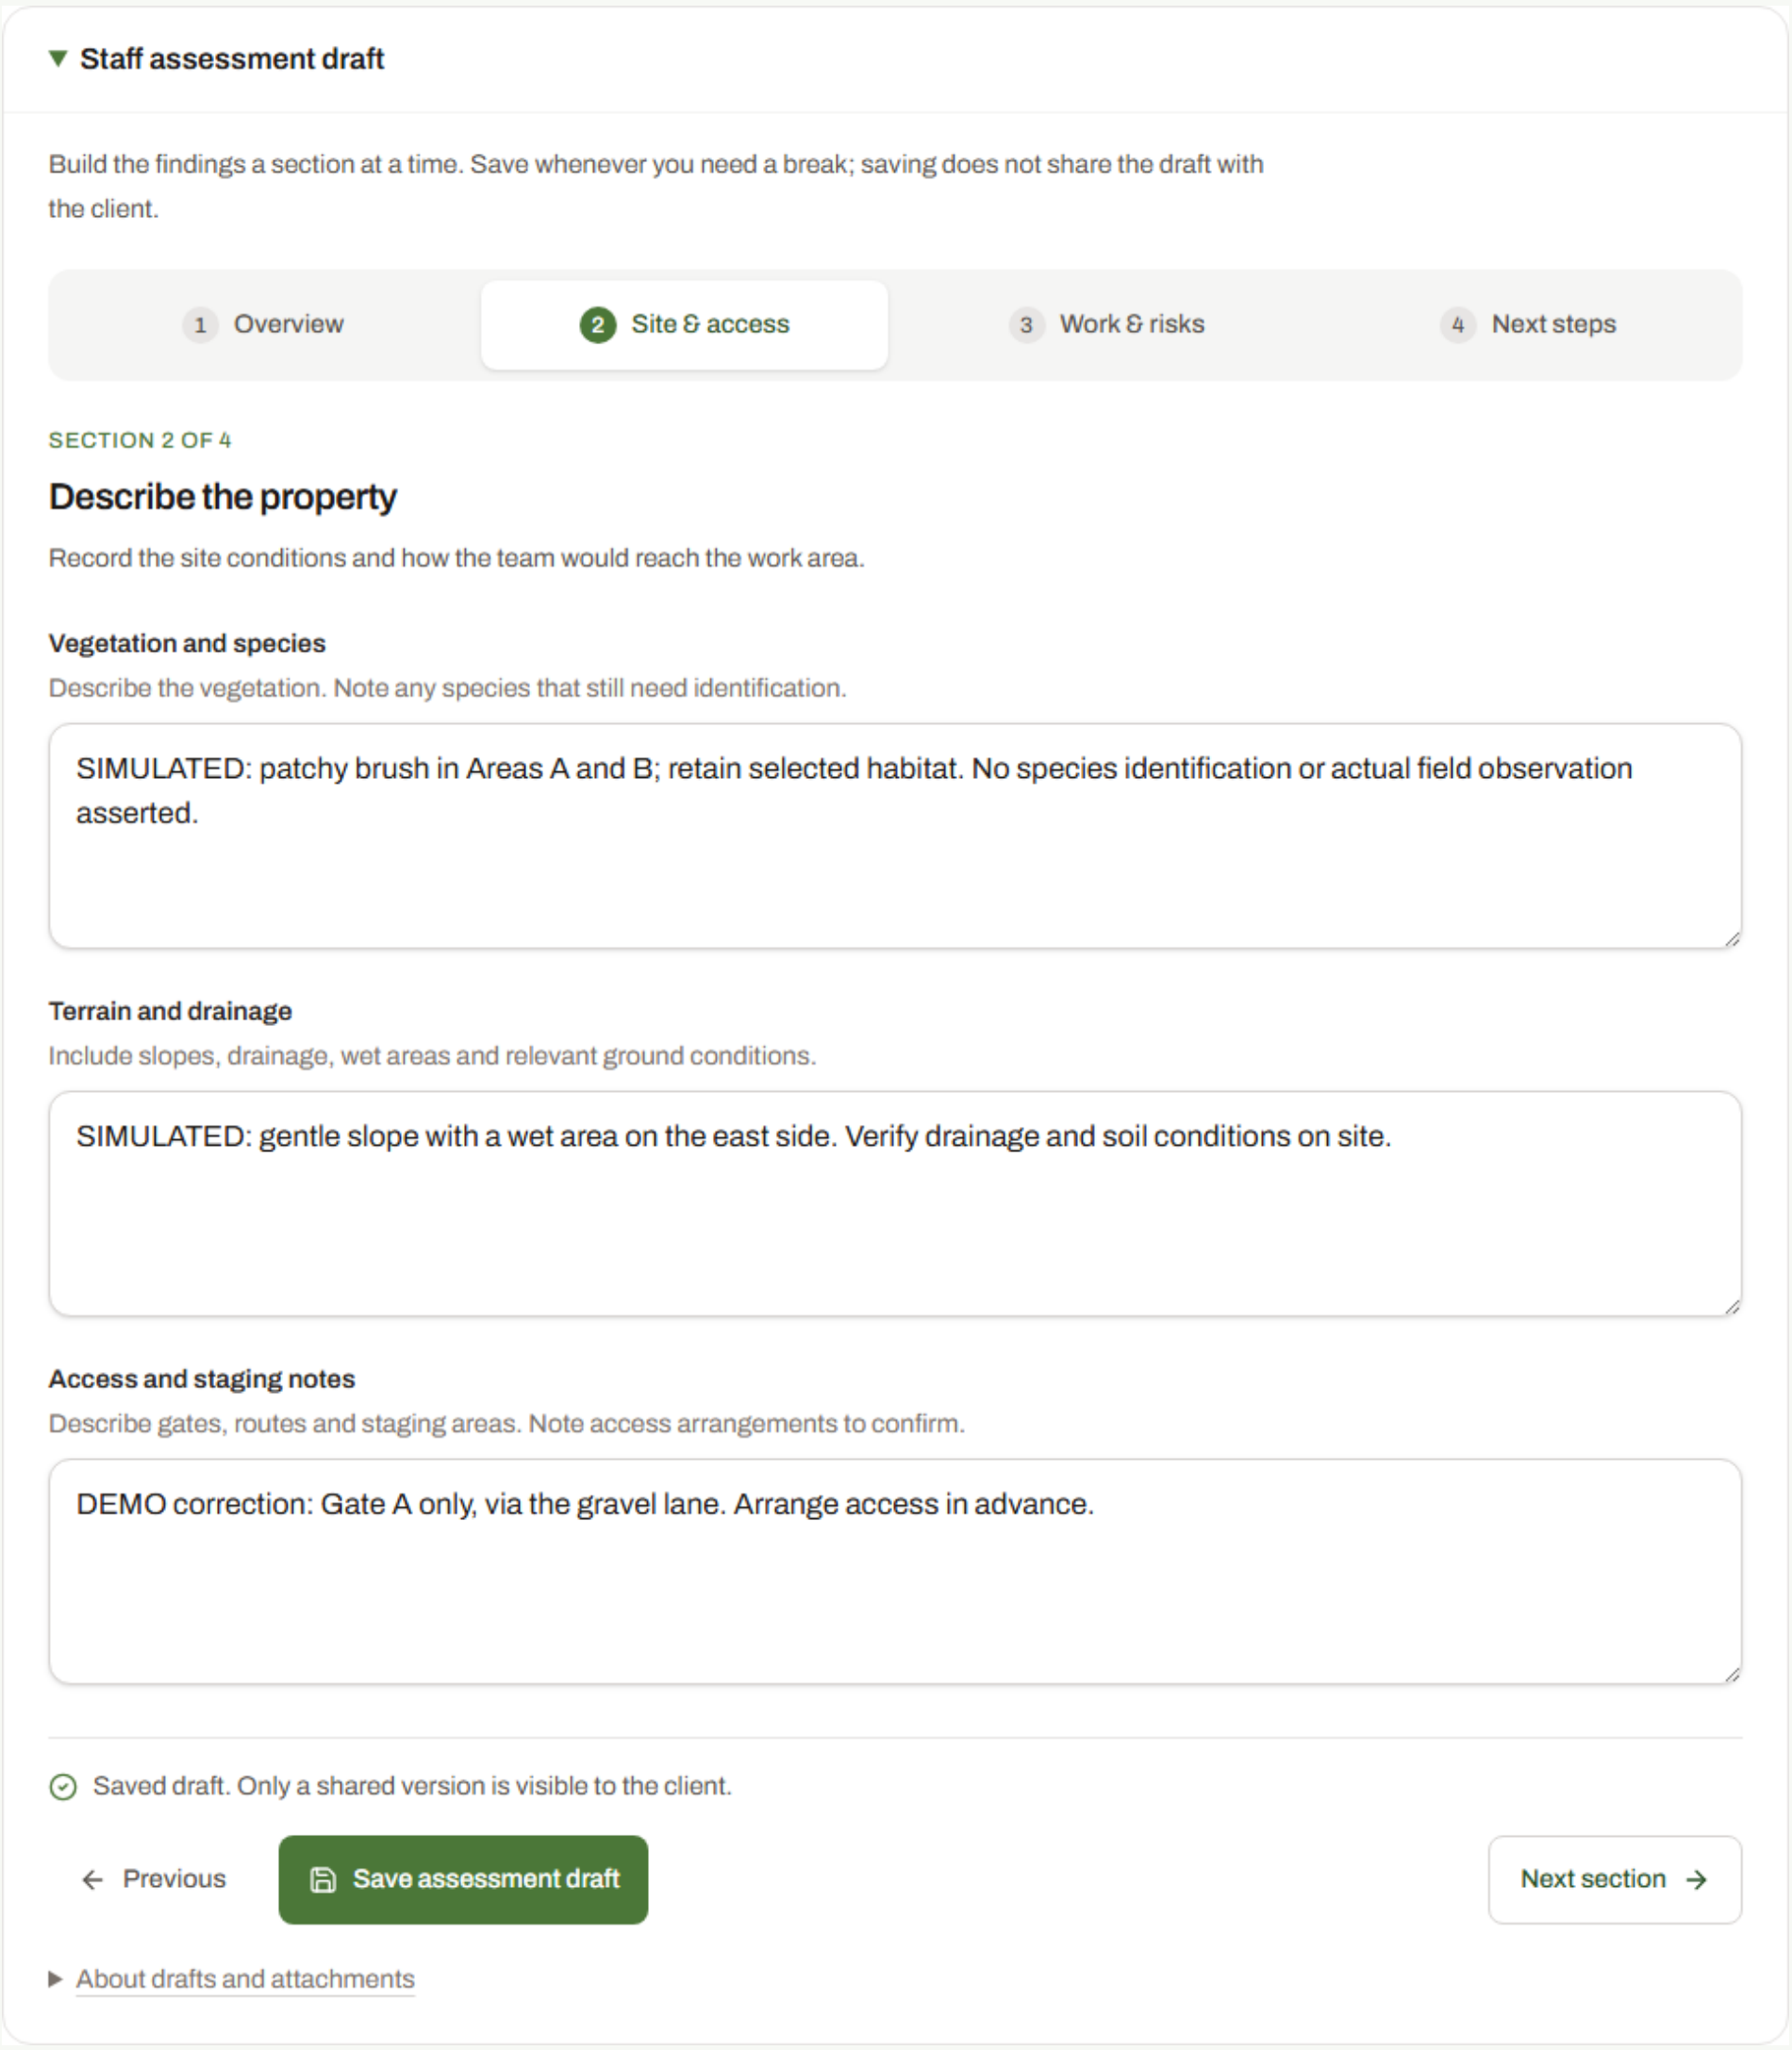

Assessment: site and access

Review vegetation, terrain, drainage, access routes and staging notes together. These are the saved fictional findings for this account's own case.

Source: /admin/land-stewardship-case/93

2026-10-23T01:13:17.430Z | image part 1/1

Assessment: work areas and risks

Define the proposed areas, exclusions and potential hazards in one focused section. No field authorization or verified utility clearance is claimed.

Source: /admin/land-stewardship-case/93

2026-10-23T01:13:17.577Z | image part 1/1

Staff assessment draft

Build the findings a section at a time. Save whenever you need a break; saving does not share the draft with the client.

1 Overview | 2 Site & access | 3 Work & risks | 4 Next steps

SECTION 3 OF 4

Define the area and its risks

Be specific about boundaries, exclusions and anything the team should check.

Proposed work areas and boundaries

Identify proposed areas and any boundaries or areas to exclude.

DEMO: Areas A and B only. The wet east boundary and habitat zone are excluded. Map is illustrative, not a survey.

Hazards and location details

Describe each potential hazard and where it is located.

Example: low branch at gate, possible private utility crossing, wet ground near the east drainage. These are fictional observations; verify the real site and locate evidence before operations.

Saved draft. Only a shared version is visible to the client.

← Previous | Save assessment draft | Next section →

▶ About drafts and attachments

Assessment: recommendations and next steps

Summarize the recommendations and unresolved questions. Save the draft first, then use the separate sharing action to create a numbered client review copy.

Source: /admin/land-stewardship-case/93

2026-10-23T01:13:17.710Z | image part 1/1

▼ **Staff assessment draft**

Build the findings a section at a time. Save whenever you need a break; saving does not share the draft with the client.

1 Overview | 2 Site & access | 3 Work & risks | 4 Next steps

SECTION 4 OF 4

Suggest the next steps

Summarize your recommendations and any questions that still need an answer.

Recommendations

Outline the proposed approach and the next steps to discuss with the client.

EXAMPLE: prepare a selective brush-management proposal for 1.5 acres; retain wet-area exclusion and confirm boundaries before operations.

Hold points and unresolved questions

What needs to be confirmed or resolved before the case can move forward?

No assessment-entry authorization verified. No work signatures or readiness approval. Resolve utility/boundary questions before mobilization.

Saved draft. Only a shared version is visible to the client.

DEMO correction: Gate A only, via the gravel lane. Arrange access in advance.

Hazards and location details
Example: low branch at gate, possible private utility crossing, wet ground near the east drainage. These are fictional observations; verify the real site and locate evidence before operations.

Proposed work areas and boundaries
DEMO: Areas A and B only. The wet east boundary and habitat zone are excluded. Map is illustrative, not a survey.

Recommendations
EXAMPLE: prepare a selective brush-management proposal for 1.5 acres; retain wet-area exclusion and confirm boundaries before operations.

Hold points and unresolved questions
No assessment-entry authorization verified. No work signatures or readiness approval. Resolve utility/boundary questions before mobilization.

Client response: Reviewed by client. DEMO: corrected Gate A access and wet-area exclusion reviewed. This is not access permission or work authorization.

The client opens the response form

This is the live response form for saved DEMO assessment version 3, awaiting review. In My cases, open this case and go to Assessment review. Choose reviewed, changes needed or declined, add comments, then use Send assessment response. Comments are required for changes or declining. This screenshot is before a response is submitted.

Source: /my-account/land-stewardship-case/93

2026-10-23T01:13:32.879Z | image part 1/1

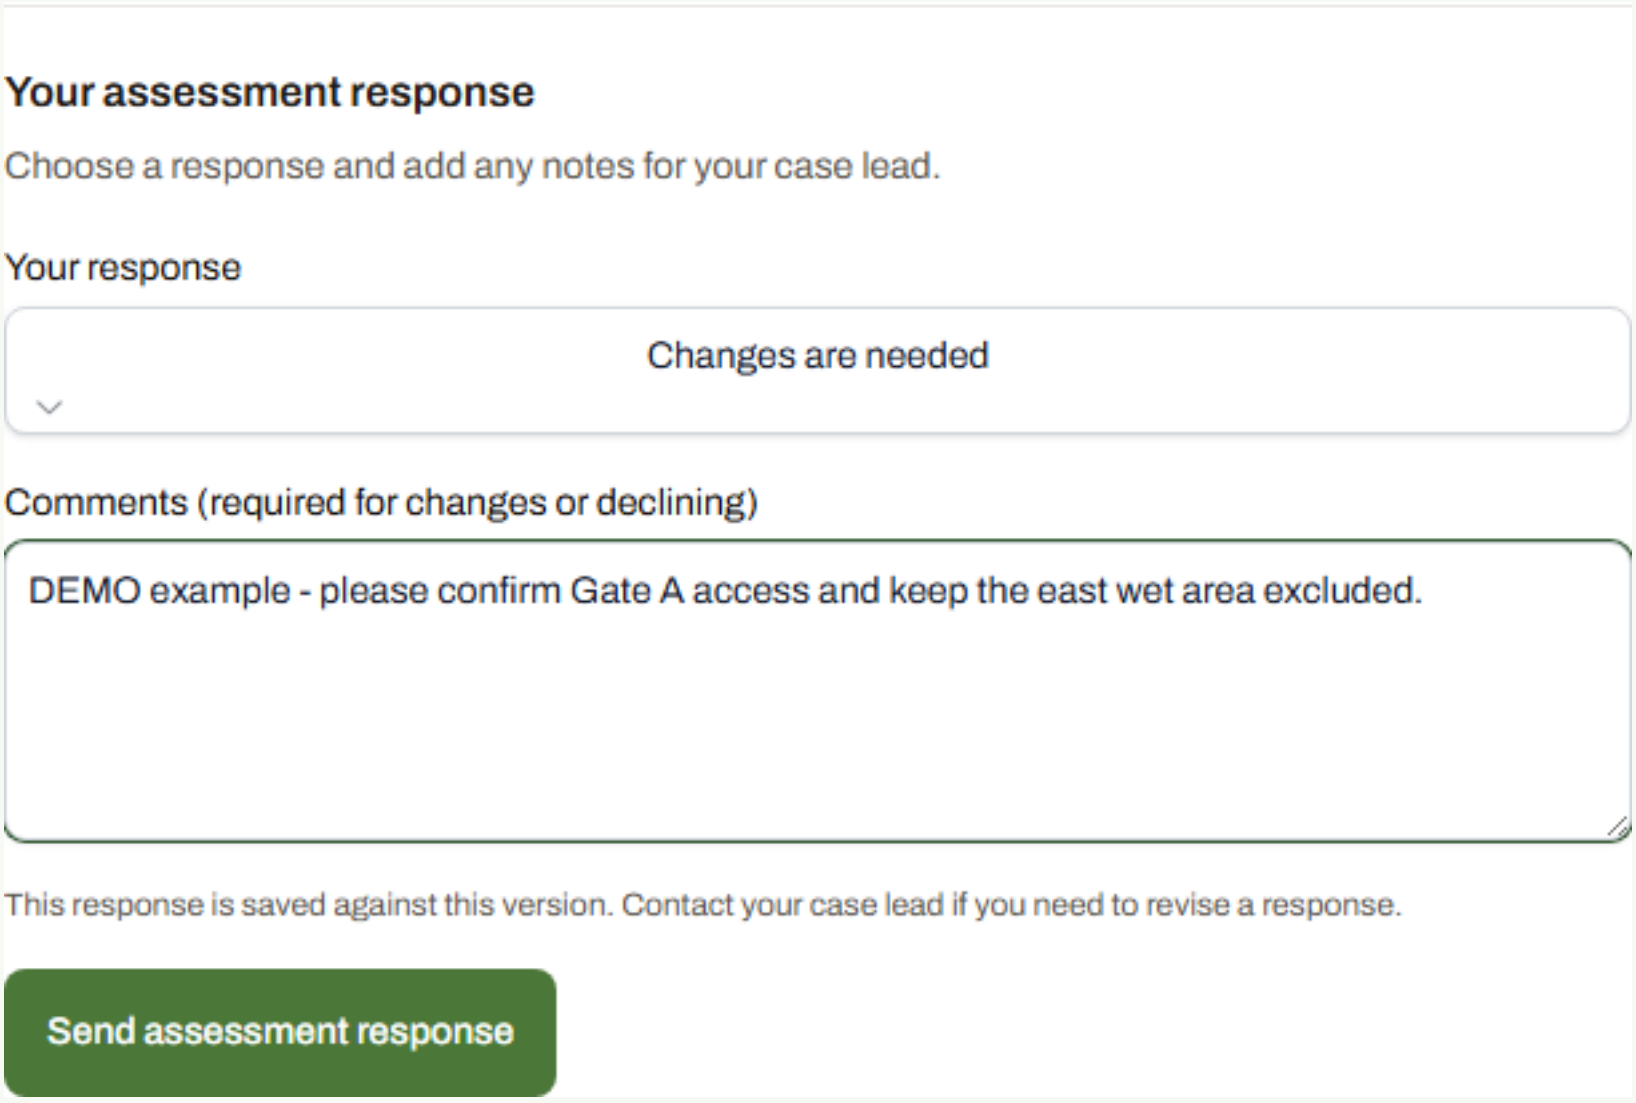

The client adds a response and comments

Unsubmitted example: Changes are needed is selected and the client has typed a case-specific comment. The Send assessment response button records the response against this version. It was not clicked for this capture; no client response was submitted. A review is separate from a signature or permission to enter or start work.

Work-order draft

Reload work order

Staff preparation only. Prices need approval before client sharing. This draft is not an agreement, invoice or permission to begin work.

Save the Case workspace first. Enter proposed rates from a named source; no rate card or discount is applied automatically. Keep equipment, labor, delivery, return and operating fuel separate. Check for duplicate charges.

Scope and site

Services and scope

Selective brush work on 1.5 acres and maintenance of the access route.

Work areas and boundaries

Areas A/B; DEMO map A

Quantities and deliverables

1.5 acres; access route; photos

Equipment and methods

Tractor, brush attachment and hand tools

Exclusions and hold points

No digging, spraying, burning or tree removal

Access and staging

Gate A; gravel lane; staging inside gate

Known site and safety conditions

Wet east area; possible private utilities

Proposed schedule and duration

3 Nov 2026; one crew shift

Planned team, delivery and return movements

Two crew members; tractor and trailer; two movements.

Rate source and revision (unapproved)

Save work-order draft

Last saved estimated subtotal: $2,000.00
Tractor with brush attachment: $900.00
Two crew members, six paid hours each: $480.00
Equipment delivery and return: $300.00
Fuel allowance: $120.00
Materials allowance: $200.00
Taxes are not calculated or included. Deposit is a proposed payment toward this subtotal, not an extra charge. Quantities accept up to four decimal places; each line amount rounds to the nearest cent.

Signing availability and document review

Production electronic signing is enabled under approved policy TASFRL-LMS-ESIGN-20261023-v1. Zulzidan and Joseph are available as authorized officers until 21 January 2027, 23:59 Asia/Makassar; choose one officer per package. This registered DEMO case remains unsigned and cannot prepare or dispatch a real execution. No package, signature or work authorization was created.

Agreements and signatures

Open signing workspace

Refresh signing status

Signatures apply to the exact package version shown here. Signing does not authorize field work or confirm readiness, scheduling or payment.

▼ Prepare a signing package

What needs to be signed?

Services, property authorization and work order

Discard selected documents before changing the purpose. The client must review this exact version before preparation.

Save work-order changes first. This package freezes saved revision 1, the complete selected terms, and the named parties. Include the complete property authorization, services agreement and work-order instruments; include the aerial addendum when applicable. Changes after preparation require a replacement package.

Complete terms and attachments

Use original TASFRL PDFs (17 September 2026)

Fill the verified source forms from the saved, reviewed versions. Signature and date fields use the original document positions. No continuation pages are added. Extra notes stay in the case record. Entries must fit the original form fields. Review every document before approving it for signing.

Sign all listed documents | **Cancel signing**

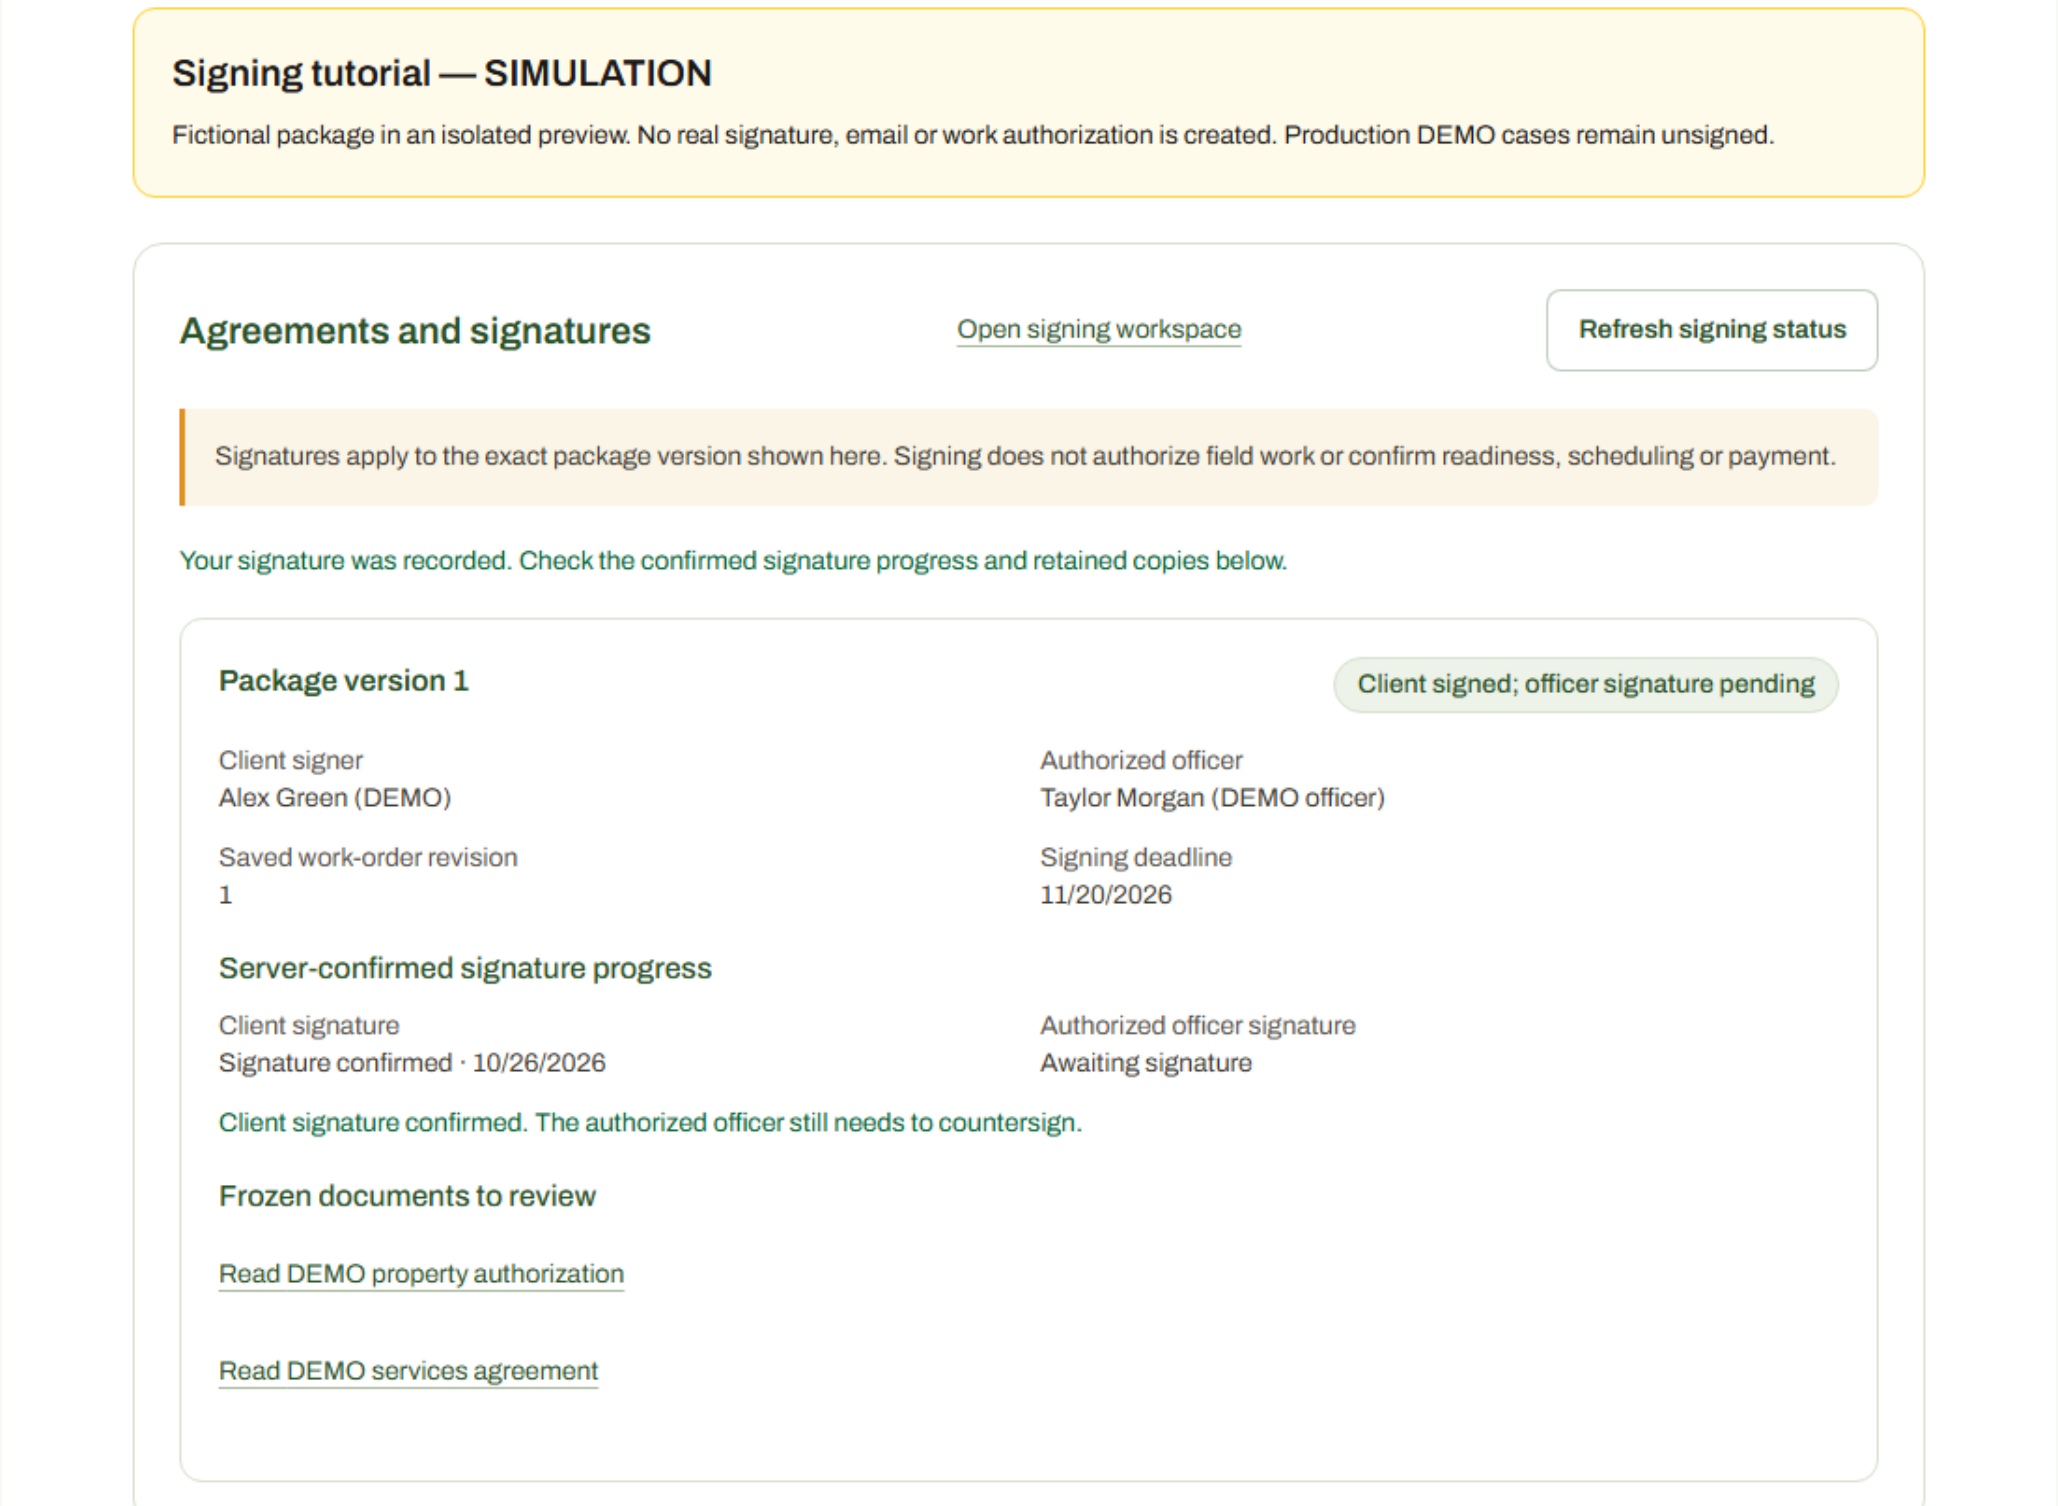

VIEW 65 / 180 | Alex Green (DEMO) | TAS-2026-0093 | Client (simulated)

Signing 5: check confirmation and who signs next

SIMULATION: After submission, check the signature progress returned by the server. A real package waits for any required additional participants and then its named officer. A confirmation screen alone does not authorize field work. This is a mocked successful client response, not a retained signature.

Source: Isolated local signing preview (simulated; not a production case)

2026-10-26T07:54:36.700Z | image part 1/1

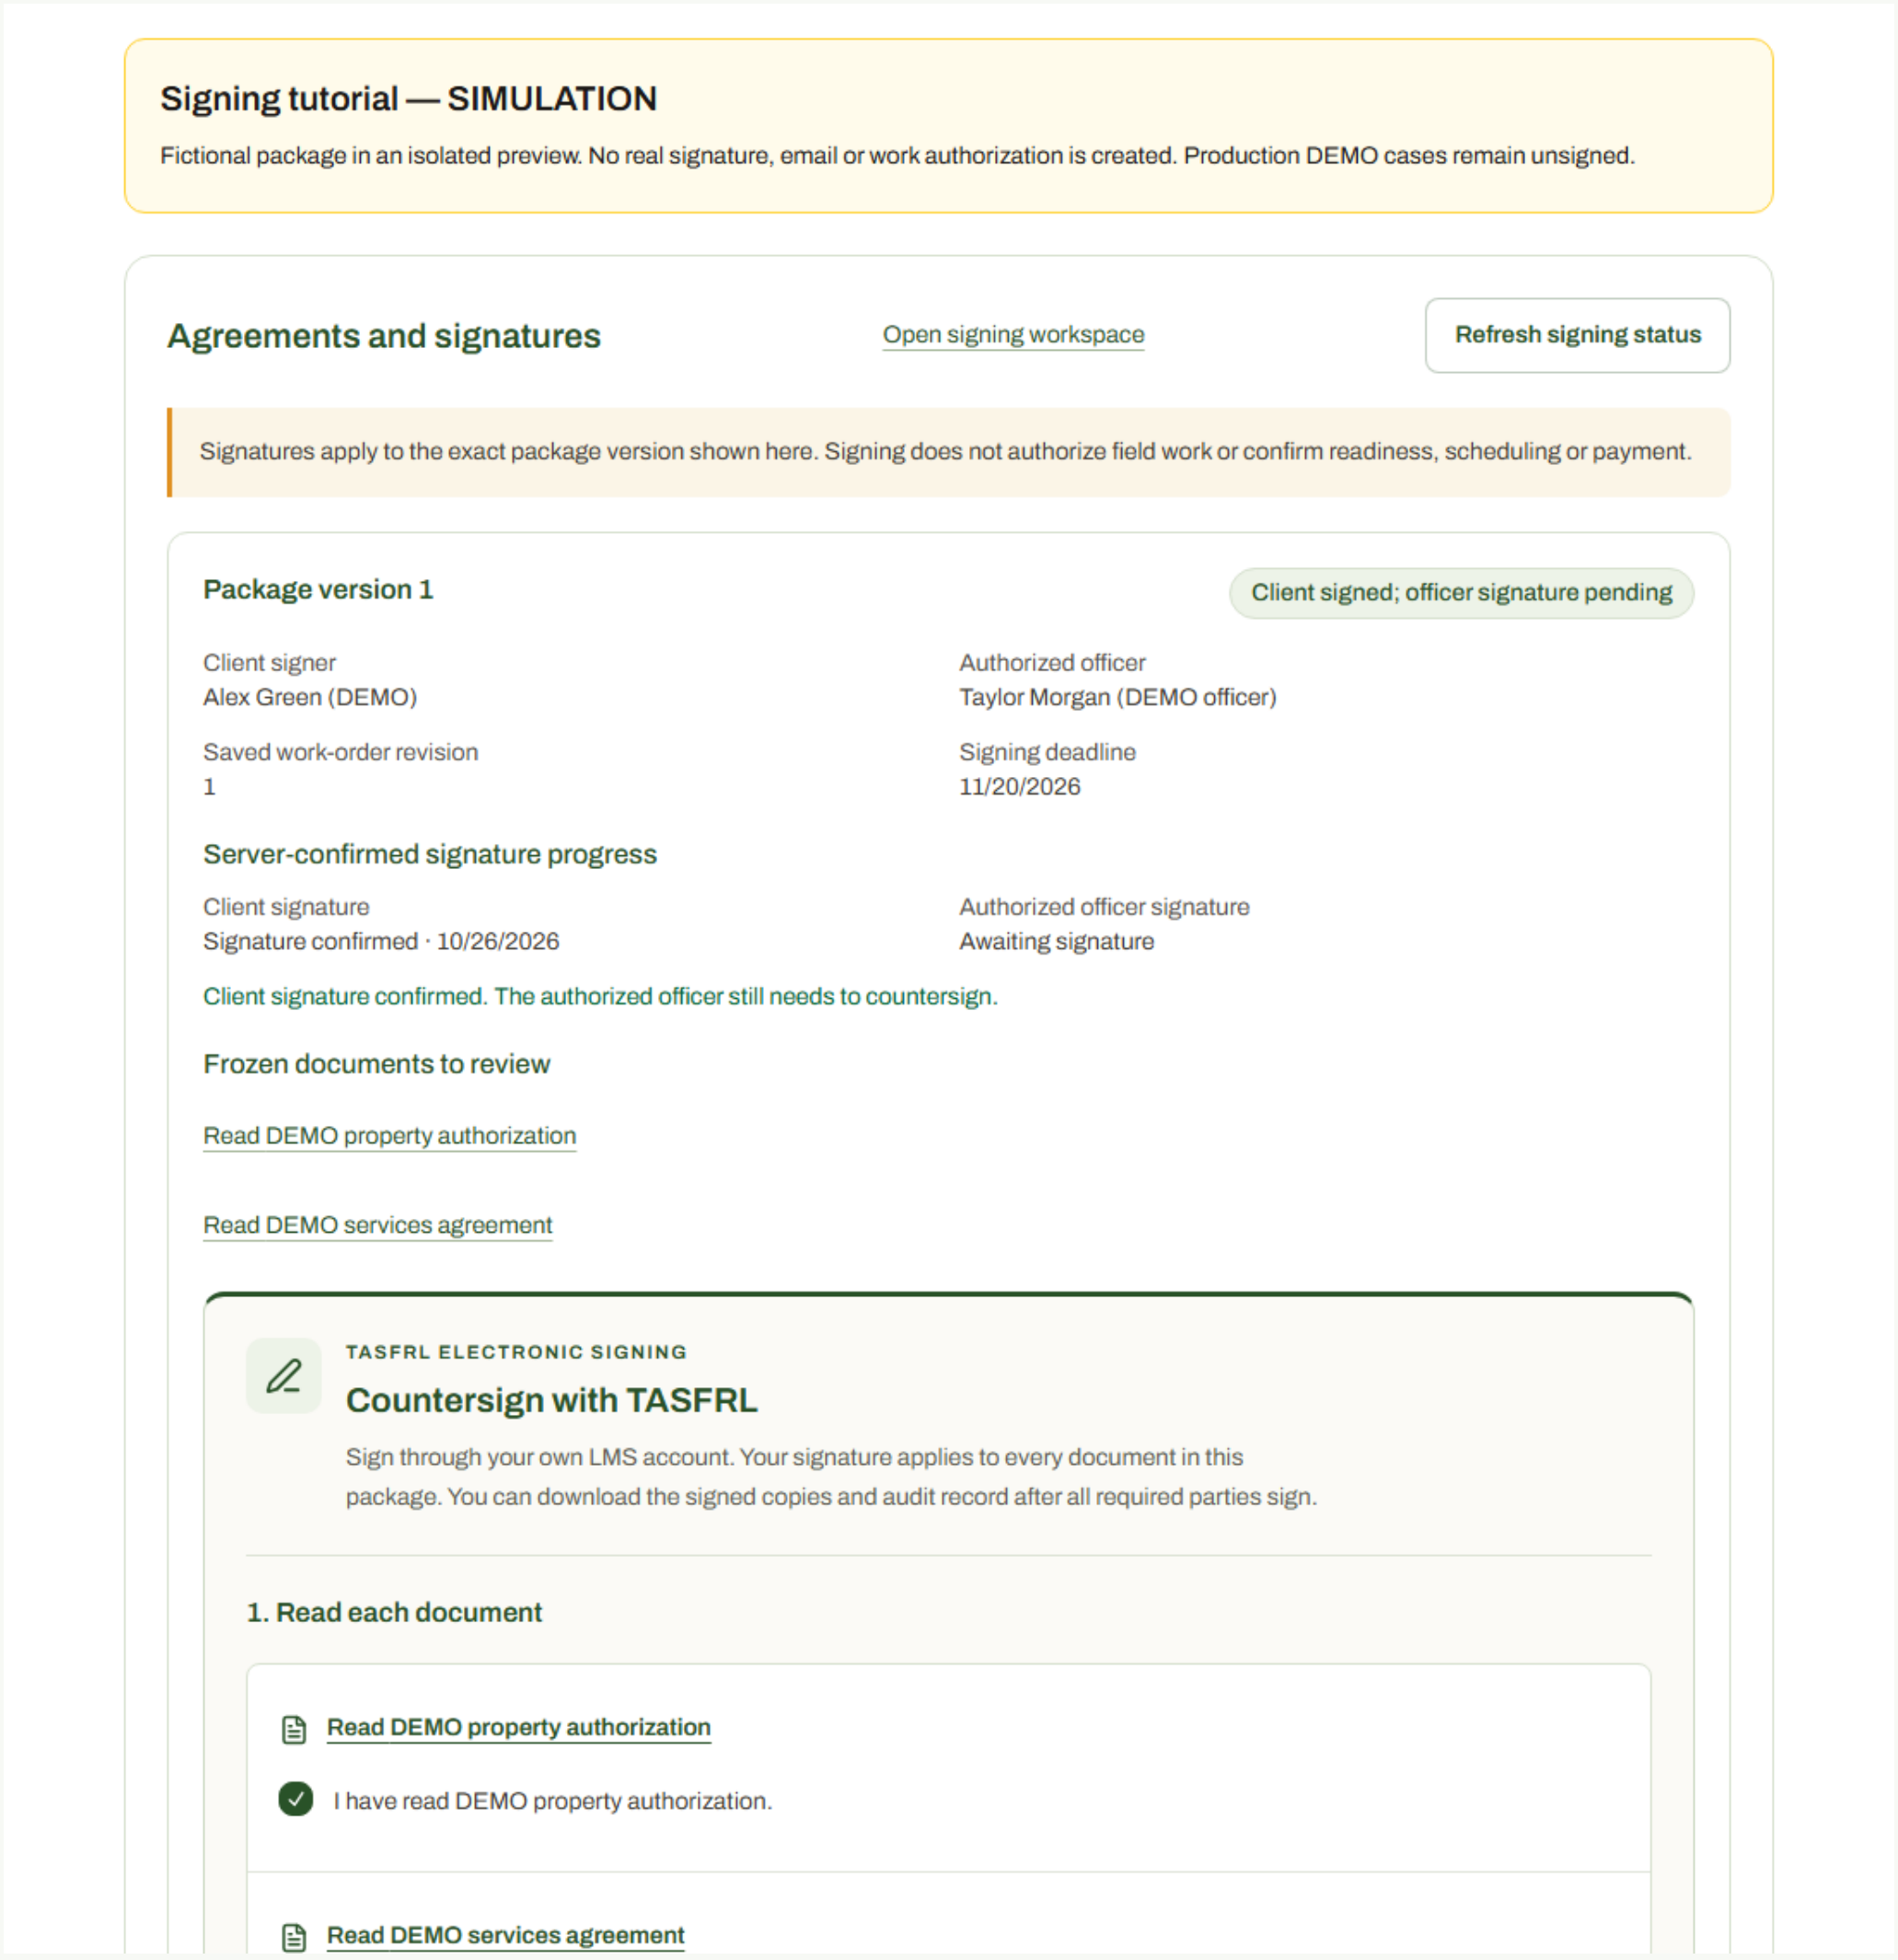

Signing 6: the named officer countersigns

SIMULATION: The selected authorized officer signs last through their own verified account, reviewing the same package and confirming current recorded authority. Additional required participants sign before the officer. This preview uses a fictional officer and simulates the step; it does not appoint an officer or grant authority.

Source: Isolated local signing preview (simulated; not a production case)

2026-10-26T07:54:37.543Z | image part 1/2

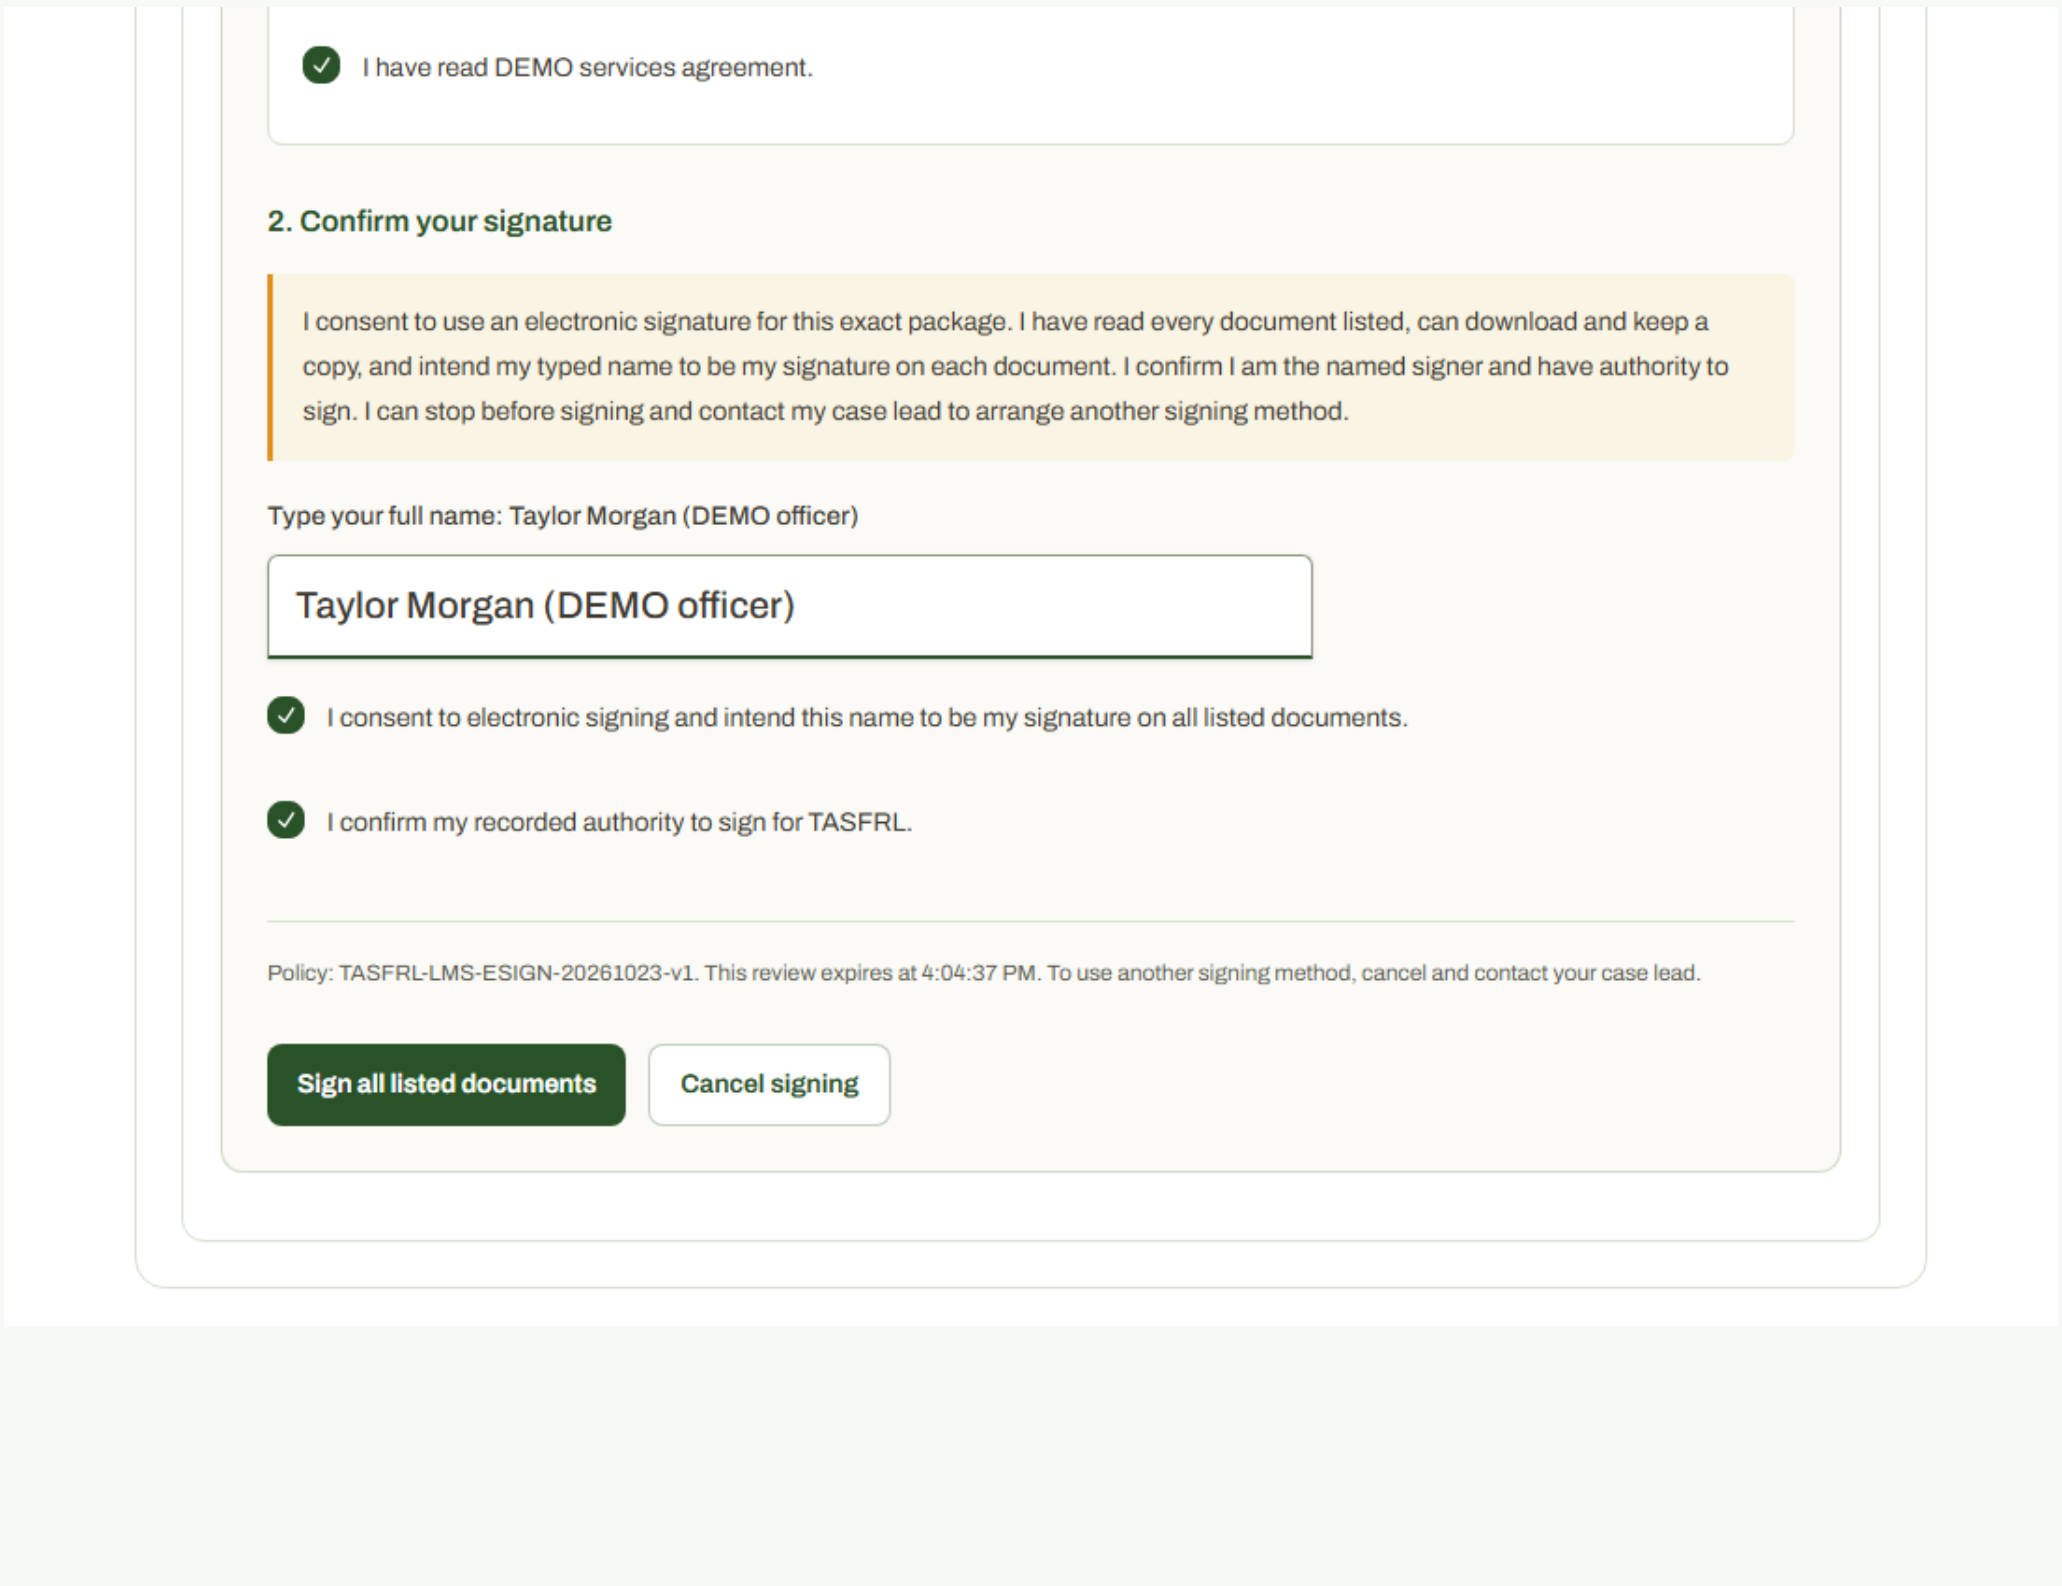

VIEW 66 / 180 | Alex Green (DEMO) | TAS-2026-0093 | Officer (simulated)

Signing 6: the named officer countersigns

SIMULATION: no real signature or completed case. Continued view 2 of 2. Same screen and capture time.

Source: Isolated local signing preview (simulated; not a production case)

2026-10-26T07:54:37.543Z | image part 2/2

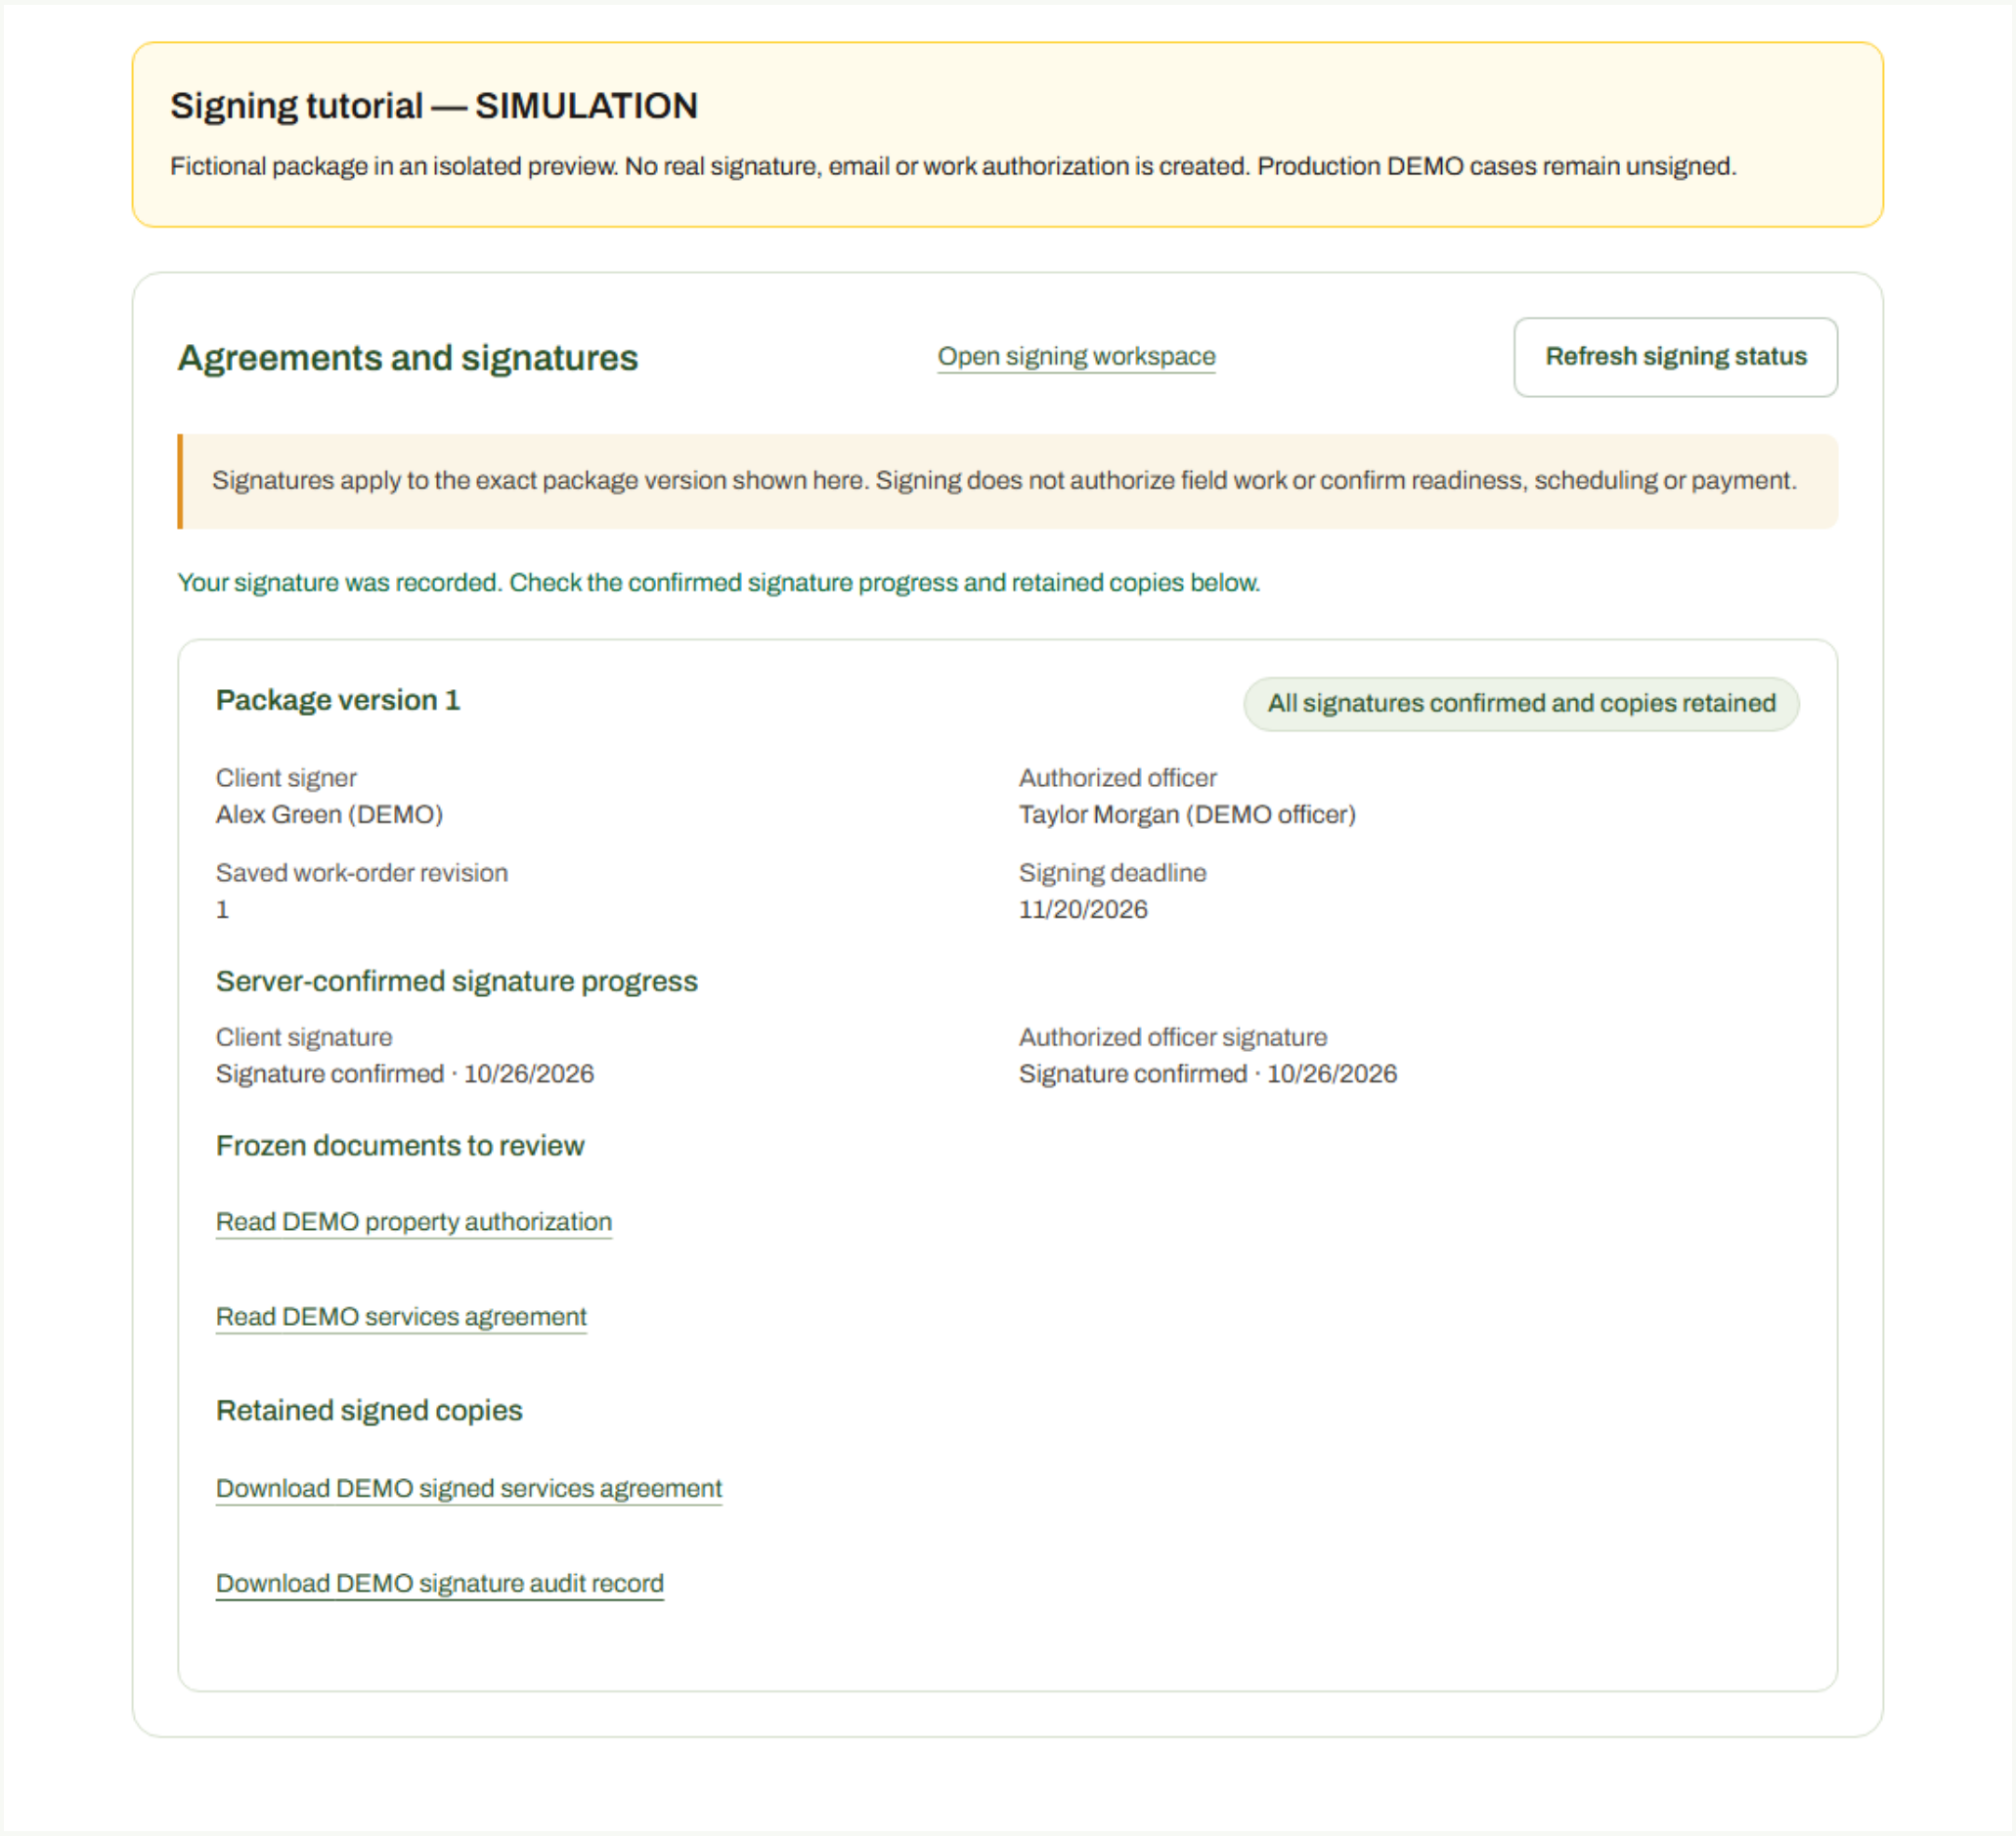

Signing 7: keep the signed copies and audit record

SIMULATION: After all required signatures are confirmed and archiving succeeds, use Retained signed copies to download the signed PDFs and audit record. If copies are still being saved, check again or contact staff. These links and completion states are simulated; no signed files were created for Alex or Jordan. Signing remains separate from work release.

Case journey and forms

Reload forms

Prepare the forms in order, record reviews, and follow each approval task.

Field work has not been authorized

Published forms and review responses record progress. Required signatures, readiness evidence and work release are separate steps.

1. Assessment and property access
Current stage

2. Scope and agreed pricing

3. Agreements and required signatures

4. Readiness and scheduling

5. Field work and changes

6. Completion and billing records

▼ Optional forms and internal approvals

Optional media permissions

Internal policy and pricing approvals

VIEWING TASKS · SAVED STAGE UNCHANGED

5. Field work and changes

Start only released, scheduled work. Record daily work/time/equipment in 13. Use 05 for scope, price or schedule changes, and internal 14 for incidents.

Resolve work holds through authorized operations actions. Client review alone cannot apply a change or restart work.

05 · Change order — Approval needed

Next: Authorized pricing reviewer

Review this exact frozen version and record the required approval evidence.

Open form →

13 · Daily field record — Recorded

Next: Assigned staff

Retain the record and recheck it if the scope or conditions change.

Risk Acknowledgment & Property Authorization

Acknowledgment of authority, normal land-management risks, and safety

Client / Land Steward	Alex Green (DEMO)
Property	60 Practice Lane; Areas A and B
Related Work Order / Date	DEMO-93 /

1. Property Authority & Information

Client confirms authority to permit the work and authorizes TASFRL and approved personnel to enter agreed work/staging areas; transport, load/unload, stage, and operate approved equipment/aerial systems; and create project maps, photos, aerial imagery/video, GPS data, and records. Client will disclose known boundaries, access limits, utilities/private facilities, structures, occupants, livestock, restrictions, and hazards.

2. Normal Land-Management Risks

Outdoor land work, equipment transport, drone services, and aerial application involve changing conditions. Even with reasonable care, work may leave or reveal ruts, disturbed soil, debris, drainage/access changes, vegetation regrowth, hidden objects, or other site variation. Weather, vegetation, wildlife, terrain, visibility, airspace, and access may affect results. Unless the Work Order states a specific deliverable, TASFRL does not guarantee a graded, engineered, erosion-free, maintenance-free, or biologically permanent result.

3. Safety & Hidden Conditions

Client will keep people, animals, vehicles, and personal property outside active work, staging, loading/unloading, and aerial areas and follow reasonable safety instructions. TASFRL may pause, relocate, modify, or stop work for unsafe, unlawful, unsuitable, out-of-scope, or undisclosed conditions, including unknown utilities, buried objects, contamination, unstable ground, disputed boundaries, or protected resources.

4. Shared Responsibility

Each party is responsible for matters within its reasonable control and for loss caused by its negligence, willful misconduct, material breach, or failure to perform an assigned responsibility. If both contributed, responsibility follows fault. Client should promptly report injury, damage, or a claimed deficiency and allow reasonable inspection before nonemergency repair when practical.

TASFRL will use reasonable care. Nothing in this acknowledgment limits responsibility for negligence, gross negligence, willful misconduct, fraud, or liability that cannot lawfully be limited.

By signing, Client confirms an opportunity to review the agreed work, property conditions, normal risks, and shared responsibilities and to ask questions before work begins.

Land Management Services Agreement

General terms for TASFRL land stewardship projects

Effective Date	2026-11-02
Client Legal Name	Alex Green (DEMO)
Property / Primary Service Area	60 Practice Lane; Areas A and B
Client Contact	lms-demo-tour-20261017@lms-pilot.invalid

How this works: this Agreement sets the general relationship. Each project requires a signed Work Order showing the exact work, location, pricing, schedule, and special conditions. No field work is authorized until required project documents and readiness checks are complete.

1. How We Work Together

This Agreement is between Texas AgriForestry Small Farmers and Ranchers, a Texas nonprofit corporation doing business as Texas AgriForestry Small Farmers, Ranchers, and Landowners ("TASFRL"), and the Client identified above. Services are authorized only through signed Work Orders.

Agreement Documents include this Agreement, the applicable Work Order, Risk Acknowledgment, approved Change Orders, applicable specialized addenda, and any Rate Card revision identified in the Work Order. The Work Order controls project-specific scope, price, quantities, and schedule; specialized addenda control their subject; this Agreement controls general terms.

2. What TASFRL Will Do

TASFRL will perform authorized Services with reasonable care, using personnel, equipment, and practices reasonably suited to known conditions and scope. Services may include land clearing/forestry, access/trails, vegetation and pasture/timber improvement, habitat/firebreak/storm work, light excavation/drainage, precision agriculture/data, drone imaging/mapping, aerial product application, and other approved work.

TASFRL will maintain licenses, registrations, insurance, and qualifications required for services TASFRL directly performs and will follow applicable law, safety, FAA/airspace, transport, and product requirements when they apply. When a specialized service is performed by an independent contractor, that contractor remains responsible for its own licensing, certification, insurance, personnel, professional methods, and operational decisions under the applicable contractor and client agreements.

TASFRL will use reasonable care with nonpublic client/property information. Public promotion using identifiable client names, testimonials, property images, or aerial footage requires separate permission, except required grant, audit, insurance, or regulatory disclosure.

3. What We Need From You

Client will provide lawful authority, safe access/routes/staging areas suitable for planned equipment, and an authorized decision-maker; disclose known boundaries, utilities/private facilities, easements/restrictions, hazards, occupants/livestock, sensitive areas, and site/transport conditions; and keep people, animals, vehicles, and personal property outside active work areas.

Client is responsible for owner/access permissions, private utility locating, and property-owner permits unless the Work Order assigns a specific item to TASFRL. A site assessment records visible conditions and client-provided information; it is not a survey, engineering/environmental report, utility locate, or guarantee that every condition is found. Hidden conditions may require work to stop, move, or change.

4. Pricing, Scheduling & Changes

Work Order pricing may be fixed, time-and-equipment, per acre, unit price, estimated range, or another stated basis. It may separately state equipment, attachments, per-person labor, fuel/DEF, aerial systems, loaded movements, materials/products, disposal, permits, third-party costs, and other approved charges. Estimates may change with actual conditions unless fixed or not-to-exceed.

Unless stated otherwise, a heavy-equipment day includes up to 8 operating/meter hours. Field-equipment and aerial operations use at least a two-person team; TASFRL may require more for safety, terrain, acreage, product handling, regulation, site conditions, logistics, or complexity. Labor is billed per team member.

DEMO - FICTIONAL TRAINING RECORD - NOT FOR SIGNING OR WORK

Original Form 03: Services agreement - page 2 of 2

Rendered from the actual production download for saved Form 03, version 1. This is a view of the downloaded PDF, not a browser screenshot. The original TASFRL artwork and page count are preserved. Every page is marked DEMO, and signature fields remain blank.

Source: /api/lms/cases/93/workflow/versions/2c55c891-a870-4af7-aa99-8226937963bf/pdf

2026-10-17T04:06:26.151353+00:00 | image part 1/1

Delivery and return are separate loaded movements. The loaded-movement rate may include normal TASFRL truck/trailer use, transport fuel, driver time, loading/unloading, securement, and scheduling. Machine operating fuel/DEF is separate unless included. Additional loads, mileage beyond the Rate Card local zone, special hauling, remobilization, and third-party transport may be separate.

Dates are estimates unless expressly stated otherwise. Weather, wildfire, soil, access, locates, permits, airspace, equipment, transport, staffing, supplies, and safety may require rescheduling. Material changes to scope, quantity, method/product, equipment/attachment, team size, transport plan, fuel/DEF basis, schedule, or price require a Change Order or clear electronic approval by authorized representatives.

Deposits are credited to the project and may be applied to reasonable actual or stated cancellation costs after TASFRL commits resources; any remainder is refunded. Invoices are due within 15 calendar days after the invoice date unless the applicable signed Work Order states another period. Undisputed amounts remain due. Taxes and governmental charges, disposal, permits, special insurance, and third-party/pass-through costs are separate unless the Work Order states otherwise; Client will provide applicable exemption documentation.

5. Results, Risk & Responsibility

Natural land and biological systems vary. Unless the Work Order states a specific performance standard, TASFRL does not guarantee vegetation mortality, no regrowth, exact mulch depth, appearance, drainage/erosion performance, crop/timber value, product efficacy, future property condition, survey-grade data, or complete aerial coverage. Client remains responsible for reasonable post-service maintenance and safe use.

The Risk Acknowledgment is part of each field project. Each party is responsible, to the extent permitted by law, for loss or third-party claims caused by its negligence, willful misconduct, material breach, or failure to perform assigned responsibilities. If both contributed, responsibility follows fault. Each party will maintain insurance reasonably appropriate to its operations/property; project-specific requirements may be stated in the Work Order.

Except for payment obligations, bodily injury, physical property damage, third-party claims, fraud, gross negligence, willful misconduct, or liability that cannot lawfully be limited, neither party is liable for indirect or consequential economic damages. Purely economic claims are capped at the amount paid or payable under the Work Order giving rise to the claim.

6. Pausing or Ending Work

Either party may end an unstarted Work Order by written notice subject to stated deposit/committed-cost terms. TASFRL may pause immediately for unsafe/unlawful conditions, undisclosed hazards, denied access, client interference, licensing/insurance deficiencies, or material nonpayment. If work has begun, Client will pay for authorized work and reasonable committed project costs through the stop date.

7. Resolving Concerns & General Terms

The parties will first try to resolve concerns directly and, if needed, through mediation before suit unless immediate action is reasonably necessary. Texas law governs; unless otherwise agreed or required by law, venue is a court serving Nacogdoches County, Texas.

The signed Agreement Documents are the complete agreement. Changes must be written or clearly documented electronically by authorized representatives. If one provision is unenforceable, the rest remain effective. Electronic signatures are permitted; neither party may bind the other without authority.

TASFRL may offer Community Stewardship, grant-supported, subsidized, or payment arrangements consistent with its mission, Board-approved criteria, funding, and grant requirements. Approved pricing must be shown in or incorporated by the Work Order. Reduced pricing does not reduce safety/disclosure duties or create a right to future pricing; direct out-of-pocket costs are not automatically discounted unless funded or approved.

Agreement Acceptance

By signing, the parties confirm a shared expectation of clear communication, reasonable care, accurate property information, respect for safety, and good-faith problem solving. Project-specific work is authorized only through a signed Work Order.

Project Work Order

Project scope, pricing, schedule, and authorization

Work Order No. / Date	Case 93 / v1 / _____
Client / Property	Alex Green (DEMO) / 60 Practice Ln
TASFRL Project Lead	_____

Services & Deliverables

- ☐ Forestry mulching / brush clearing
- ☐ Vegetation / pasture / timber improvement
- ☐ Trenching / light excavation / drainage
- ☐ Drone imaging / video / mapping
- ☐ Other: _____
- ☐ Trail / access opening
- ☐ Habitat / firebreak / storm work
- ☐ Precision agriculture / field data
- ☐ Aerial product application - Addendum required
- ☐ Prescribed-burn preparation & Contractor Coordination*

*Separate burn-contractor agreement required for burn operations

Work Area / Boundaries	Areas A/B; DEMO map A
Acreage / Quantity / Deliverable	1.5 acres; access route; photos
Equipment / Method / Attachment	Tractor, brush attachment and hand tools
Exclusions / Hold Points	No digging, spraying, burning or tree removal

Site & Schedule

Access / Route / Staging	Gate A; gravel lane; staging inside gate
Known Site / Safety Conditions	Wet east area; possible private utilities
Mobilization Window / Duration	3 Nov 2026; one crew shift
Planned Team / Loaded Movements	**Team**: _____ **Delivery**: _____ **Return**: _____ **Other**: _____

Pricing

Description	Qty / Days / Hrs	Rate	Amount
Equipment / aerial system	6	$150	$900.00
Attachment(s)		$	$
Team labor	12	$40	$480.00
Loaded movement / mileage	2	$150	$300.00
Fuel / DEF	1	$120	$120.00
Materials / product / third-party / other	1	$200	$200.00

Rate Card / Revision	SAMPLE-RATES-2026-01
Deposit / Due Date	$500.00 / _____
Estimated Total / NTE	$2000.00 ☑ **Not-to-exceed** $2000.00
Payment Terms / Special Pricing	USD 500 deposit; USD 1,500 balance

Authorization

This Work Order authorizes only TASFRL-performed services and pricing stated above, subject to the Services Agreement, Risk Acknowledgment, applicable Rate Card, and approved Change Orders. If TASFRL coordinates an independent prescribed-burn contractor, that contractor remains separately contracted and responsible for burn operations under its own landowner agreement and burn plan.

Aerial Application Addendum

Client authorization for aerial product application

Use only when the Work Order includes aerial dispensing or application of a product. Aerial imaging/data capture alone does not require this addendum unless the Work Order says otherwise.

Project & Product

Work Order / Property	60 Practice Ln
Product / Material / Purpose	Not selected - preview only
Target Area / Estimated Acreage	Area C; 0.5 acre
Application Rate / Quantity	Pending applicator review
Buffers / No-Apply Areas	Pending approved site plan
Weather / Wind / Timing Limits	Application on hold
Reentry / Grazing / Harvest / Use Limits	

Sensitive Areas / People

- ☐ **Residences / roads / public areas**
- ☐ **Bees / apiaries / livestock / aquaculture**
- ☐ **Power lines / towers / airports / airspace**
- ☐ **Neighboring crops / gardens / organic areas**
- ☐ **Water / wetlands / habitat**
- ☐ **Other:** _____

Key Responsibilities

- TASFRL will use qualified personnel and proceed only when applicable legal, licensing, insurance, product, weather, airspace, equipment, and safety requirements are satisfied. TASFRL may postpone, modify, or cancel when conditions make the application unlawful or imprudent.
- Client will identify sensitive areas and occupants, provide lawful access, and follow applicable reentry, grazing, harvest, storage, use, and post-application instructions. Applicable law, product directions, and manufacturer instructions control over inconsistent client instructions.
- Coverage, efficacy, plant response, and complete absence of off-target movement cannot be guaranteed because conditions and product limitations vary; this does not excuse negligent application or violation of applicable requirements.

Authorization

By signing, Client authorizes the aerial application described above and confirms the sensitive-area and use information provided is accurate to the best of Client's knowledge. TASFRL will maintain required operational/application records in its project file.

Our Services

Comprehensive Land Management Solutions Tailored To Your Property's Unique Needs

Brush & Understory Clearing

Removes invasive brush and understory growth to improve pasture health and overall land productivity.

Trail & Access Path Creation

Creates new trails and access paths to improve land accessibility, navigation, and property management.

Timber Stand & Pasture Improvement

Improves growth conditions for forage and trees to enhance land health and overall productivity.

Habitat & Wildlife Corridor Restoration

Restores natural habitats and establishes safe wildlife corridors to improve biodiversity and ecosystem balance.

Land management request entry

Continued view 2 of 3. Same screen and capture time.

Source: /land-management-request

2026-10-19T02:13:28.001Z | image part 2/3

- Mulching of invasive brush and understory vegetation
- Selective clearing to preserve healthy trees

See more

- Creation of new access trails and pathways
- Selective clearing to maintain surrounding vegetation

See more

- Improvement of pasture conditions for healthier forage growth
- Selective management of timber stands to reduce competition

See more

- Restoration of natural wildlife habitats
- Creation of safe wildlife corridors and passageways

See more

Fire Fuel Reduction & Firebreak Support

Reduces wildfire fuel loads and supports firebreaks to improve safety for land, homes, and livestock.

- Reduction of excess vegetation and wildfire fuel
- Support for firebreak creation and maintenance

See more

Trenching & Light Excavation

Provides trenching and light excavation services to support drainage, utility, and land infrastructure needs.

- Trenching for drainage and water management projects
- Light excavation for land infrastructure needs

See more

Agricultural Drone Application

Applies treatments with precision using drone technology to support targeted and efficient land improvement.

- Precision spot and broadcast application
- Targeted treatment of specific land areas

See more

Storm & Debris Response

Provides rapid debris removal and property restoration support following severe weather events.

- Removal of fallen trees and storm debris
- Clearing of blocked access paths and property areas

See more

Infrastructure Site Preparation

Prepare stable, level ground for your agricultural structures.

- Greenhouse site preparation
- Hoop house / high tunnel leveling

See more

Save the assessment findings

The saved assessment draft opens with just the assessor, date and client goals. Four short sections guide the lead through site details, work areas, risks and next steps. Saving a draft does not share it with the client.

Source: /admin/land-stewardship-case/94

2026-10-23T01:13:43.642Z | image part 1/1

Assessment: site and access

Review vegetation, terrain, drainage, access routes and staging notes together. These are the saved fictional findings for this account's own case.

Source: /admin/land-stewardship-case/94

2026-10-23T01:13:43.828Z | image part 1/1

▼ **Staff assessment draft**

Build the findings a section at a time. Save whenever you need a break; saving does not share the draft with the client.

1 Overview | 2 Site & access | 3 Work & risks | 4 Next steps

SECTION 2 OF 4

Describe the property

Record the site conditions and how the team would reach the work area.

Vegetation and species

Describe the vegetation. Note any species that still need identification.

SIMULATED: patchy brush in Corridor C; retain selected habitat. No species identification or actual field observation asserted.

Terrain and drainage

Include slopes, drainage, wet areas and relevant ground conditions.

SIMULATED: gentle slope with a creek buffer on the north side. Verify drainage and soil conditions on site.

Access and staging notes

Describe gates, routes and staging areas. Note access arrangements to confirm.

DEMO correction: Gate C only, via the existing trail. Arrange access in advance.

Saved draft. Only a shared version is visible to the client.

← Previous | Save assessment draft | Next section →

▶ About drafts and attachments

Assessment: work areas and risks

Define the proposed areas, exclusions and potential hazards in one focused section. No field authorization or verified utility clearance is claimed.

Source: /admin/land-stewardship-case/94

2026-10-23T01:13:43.975Z | image part 1/1

▼ **Staff assessment draft**

Build the findings a section at a time. Save whenever you need a break; saving does not share the draft with the client.

1 Overview | 2 Site & access | 3 Work & risks | 4 Next steps

SECTION 3 OF 4

Define the area and its risks

Be specific about boundaries, exclusions and anything the team should check.

Proposed work areas and boundaries

Identify proposed areas and any boundaries or areas to exclude.

DEMO: Corridor C only. The north creek buffer and creek buffer are excluded. Map is illustrative, not a survey.

Hazards and location details

Describe each potential hazard and where it is located.

Example: soft ground at gate, possible private utility crossing, wet ground near the north creek. These are fictional observations; verify the real site and locate evidence before operations.

Saved draft. Only a shared version is visible to the client.

← Previous | Save assessment draft | Next section →

▶ About drafts and attachments

Assessment: recommendations and next steps

Summarize the recommendations and unresolved questions. Save the draft first, then use the separate sharing action to create a numbered client review copy.

Source: /admin/land-stewardship-case/94

2026-10-23T01:13:44.109Z | image part 1/1

▼ **Staff assessment draft**

Build the findings a section at a time. Save whenever you need a break; saving does not share the draft with the client.

1 Overview | 2 Site & access | 3 Work & risks | 4 Next steps

SECTION 4 OF 4

Suggest the next steps

Summarize your recommendations and any questions that still need an answer.

Recommendations

Outline the proposed approach and the next steps to discuss with the client.

EXAMPLE: prepare a trail-access and selective brush proposal for 1.5 acres; retain wet-area exclusion and confirm boundaries before operations.

Hold points and unresolved questions

What needs to be confirmed or resolved before the case can move forward?

No assessment-entry authorization verified. No work signatures or readiness approval. Resolve utility/boundary questions before mobilization.

Saved draft. Only a shared version is visible to the client.

← Previous | Save assessment draft

▶ About drafts and attachments

Share a numbered assessment version

Version 1 is now shared with the demo client. Its exact saved findings remain in the case.

Prepared by
EXAMPLE assigned assessor

Assessment date
2026-10-30

Client goals
Example: improve access, selectively manage brush and preserve wildlife habitat.

Vegetation and species
SIMULATED: patchy brush in Corridor C; retain selected habitat. No species identification or actual field observation asserted.

Terrain and drainage
SIMULATED: gentle slope with a creek buffer on the north side. Verify drainage and soil conditions on site.

Access and staging notes
Example: enter at Gate C on the south boundary; use the marked existing access trail. Meet the assessor at the gate. Staging is inside the gate. Keep the north creek buffer out of bounds. Do not invent a gate code.

Hazards and location details
Example: soft ground at gate, possible private utility crossing, wet ground near the north creek. These are fictional observations; verify the real site and locate evidence before operations.

Proposed work areas and boundaries
Corridor C on Map C (illustrative). Preserve the north creek buffer and the marked habitat zone. Map is illustrative, not a survey.

Recommendations
EXAMPLE: prepare a trail-access and selective brush proposal for 1.5 acres; retain wet-area exclusion and confirm boundaries before operations.

Hold points and unresolved questions
No assessment-entry authorization verified. No work signatures or readiness approval. Resolve utility/boundary questions before mobilization.

Client response: Client requested changes. DEMO: please state clearly that the north creek buffer is excluded and use Gate C only.

Reason to withdraw version 1

Withdraw version 1

Save work-order draft

Last saved estimated subtotal: $2,000.00
Tractor with brush attachment: $900.00
Two crew members, six paid hours each: $480.00
Equipment delivery and return: $300.00
Fuel allowance: $120.00
Materials allowance: $200.00
Taxes are not calculated or included. Deposit is a proposed payment toward this subtotal, not an extra charge. Quantities accept up to four decimal places; each line amount rounds to the nearest cent.

Signing availability and document review

Production electronic signing is enabled under approved policy TASFRL-LMS-ESIGN-20261023-v1. Zulzidan and Joseph are available as authorized officers until 21 January 2027, 23:59 Asia/Makassar; choose one officer per package. This registered DEMO case remains unsigned and cannot prepare or dispatch a real execution. No package, signature or work authorization was created.

Agreements and signatures

Open signing workspace

Refresh signing status

Signatures apply to the exact package version shown here. Signing does not authorize field work or confirm readiness, scheduling or payment.

▼ Prepare a signing package

What needs to be signed?

Services, property authorization and work order

Discard selected documents before changing the purpose. The client must review this exact version before preparation.

Save work-order changes first. This package freezes saved revision 1, the complete selected terms, and the named parties. Include the complete property authorization, services agreement and work-order instruments; include the aerial addendum when applicable. Changes after preparation require a replacement package.

Complete terms and attachments

Use original TASFRL PDFs (17 September 2026)

Fill the verified source forms from the saved, reviewed versions. Signature and date fields use the original document positions. No continuation pages are added. Extra notes stay in the case record. Entries must fit the original form fields. Review every document before approving it for signing.

Freeze package for review

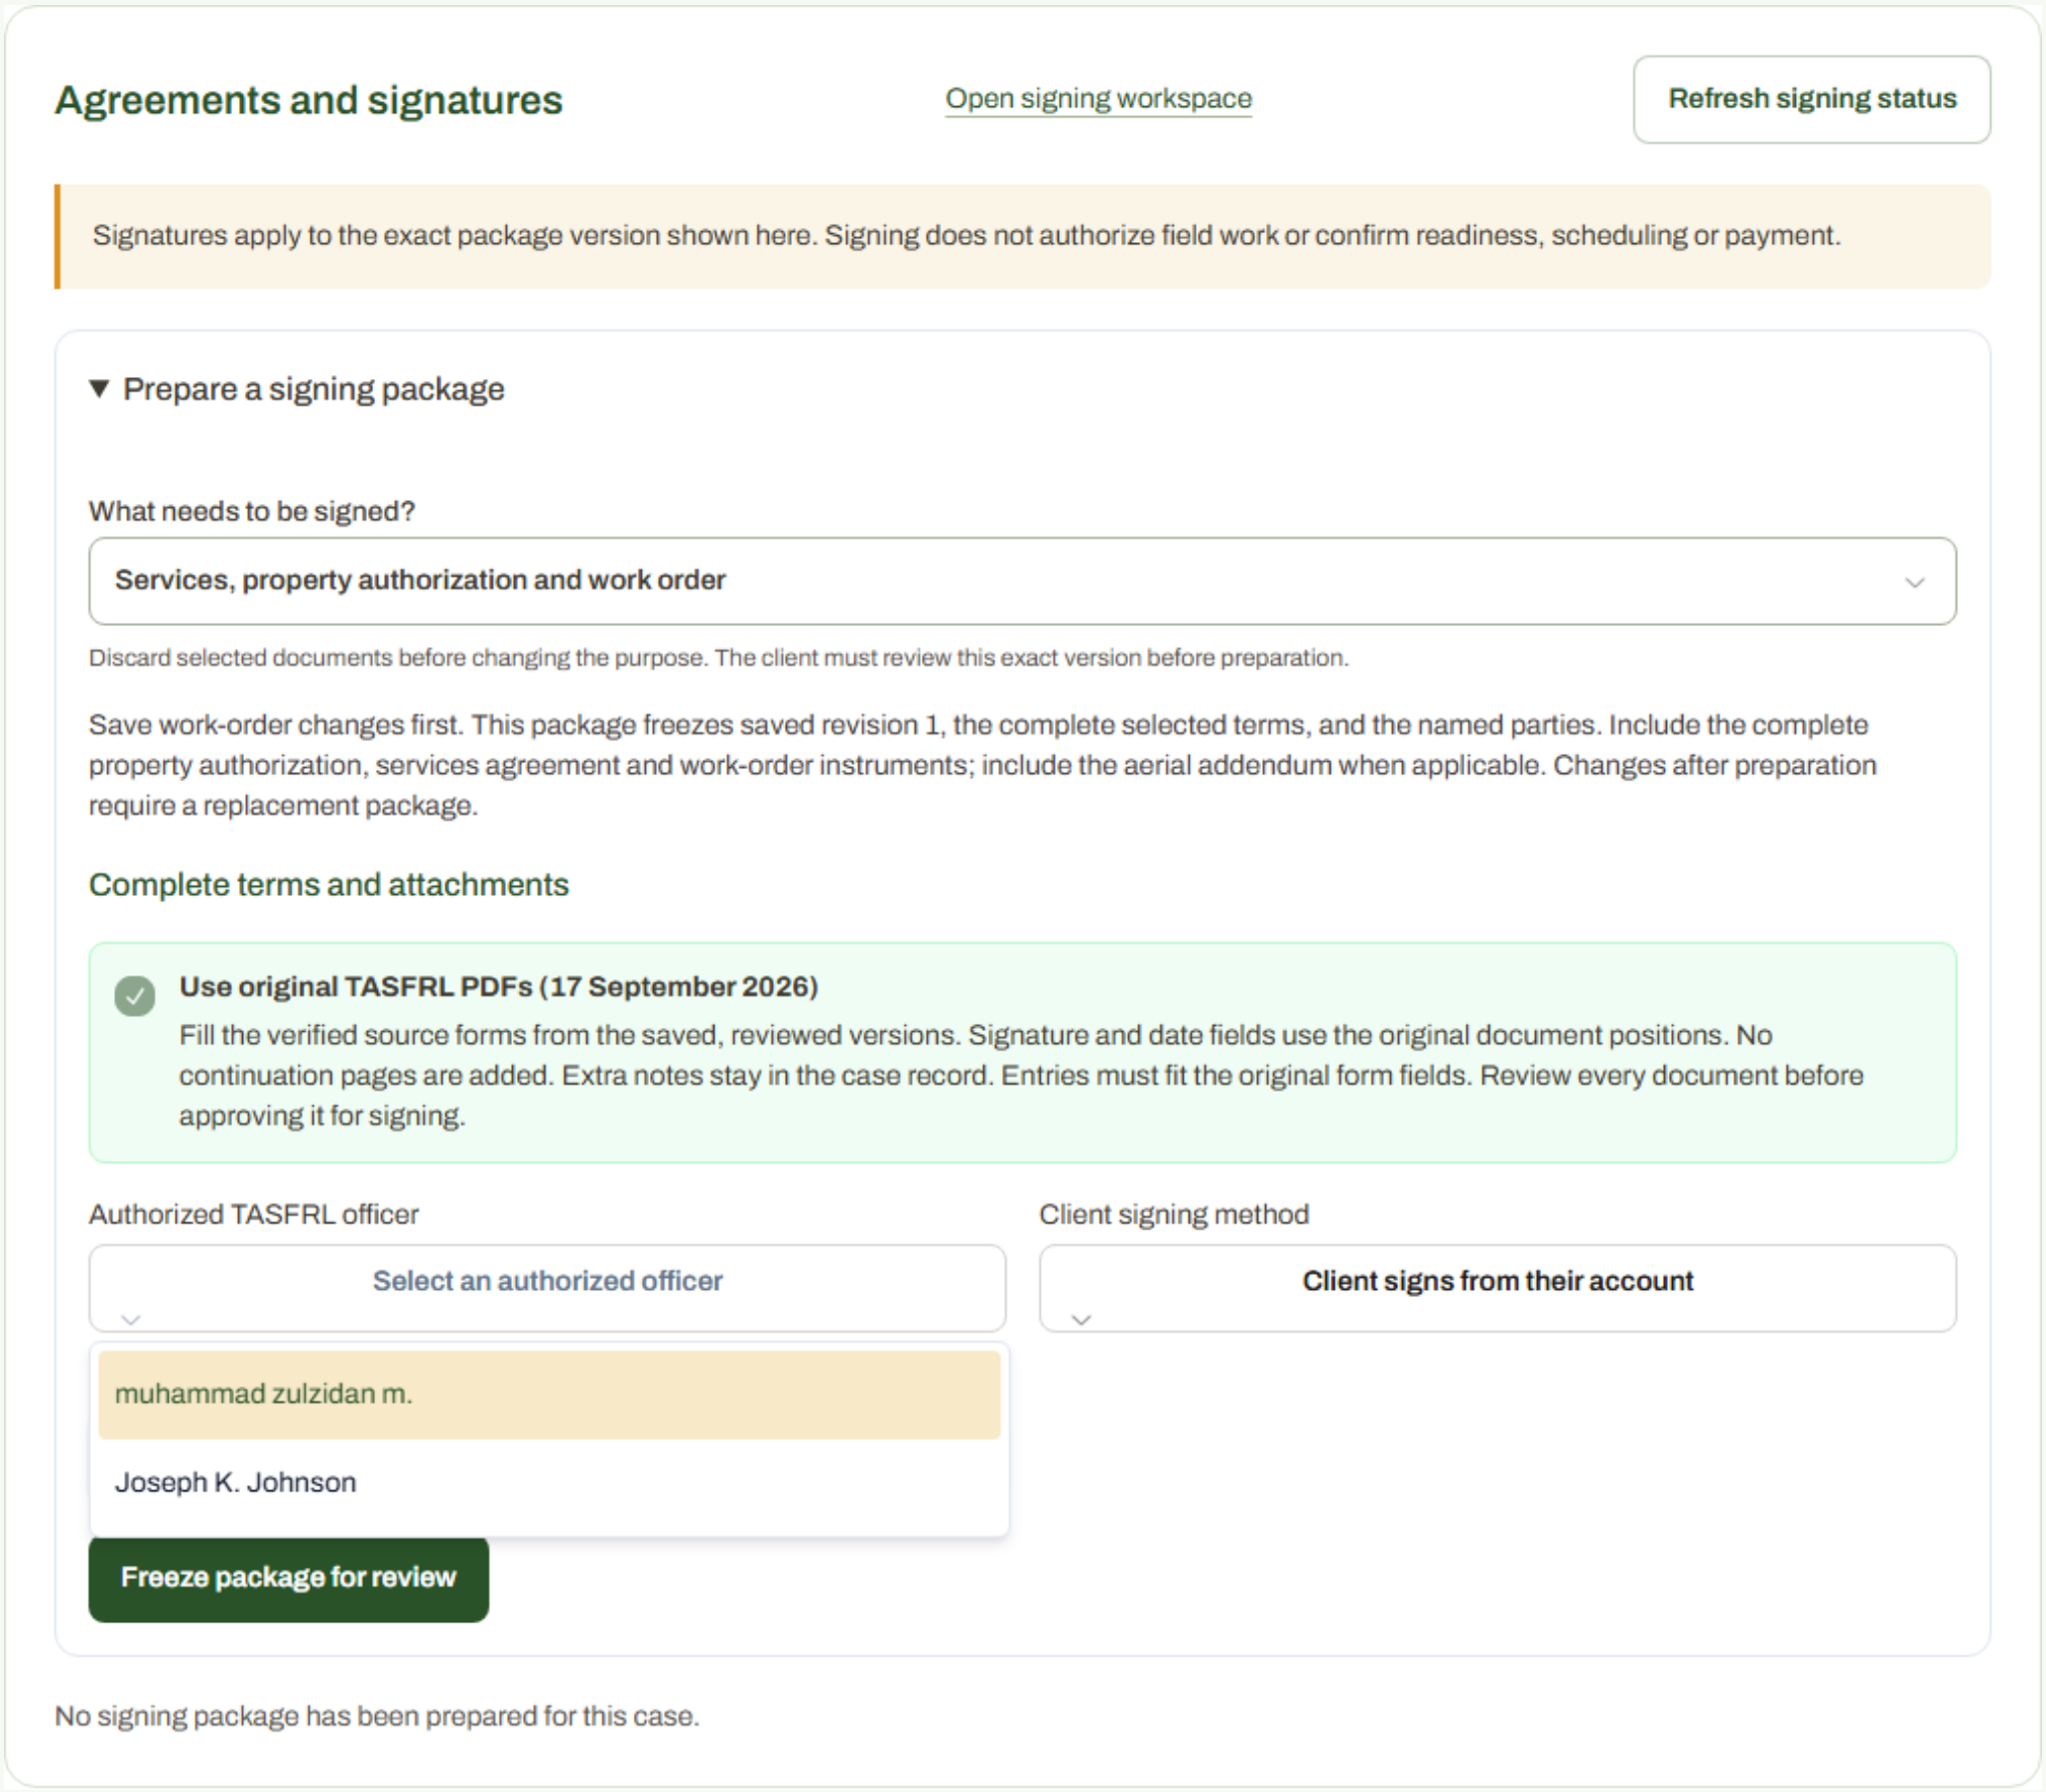

No signing package has been prepared for this case.

Available authorized TASFRL officers

The current production officer selector offers Zulzidan and Joseph. Their recorded authority expires on 21 January 2027 at 23:59 Asia/Makassar. Each real package selects one officer. This is an unsubmitted selector in a registered DEMO case; no officer was assigned to a package and no signature or operational authorization was created.

2026-10-23T01:14:33.074Z | image part 1/1

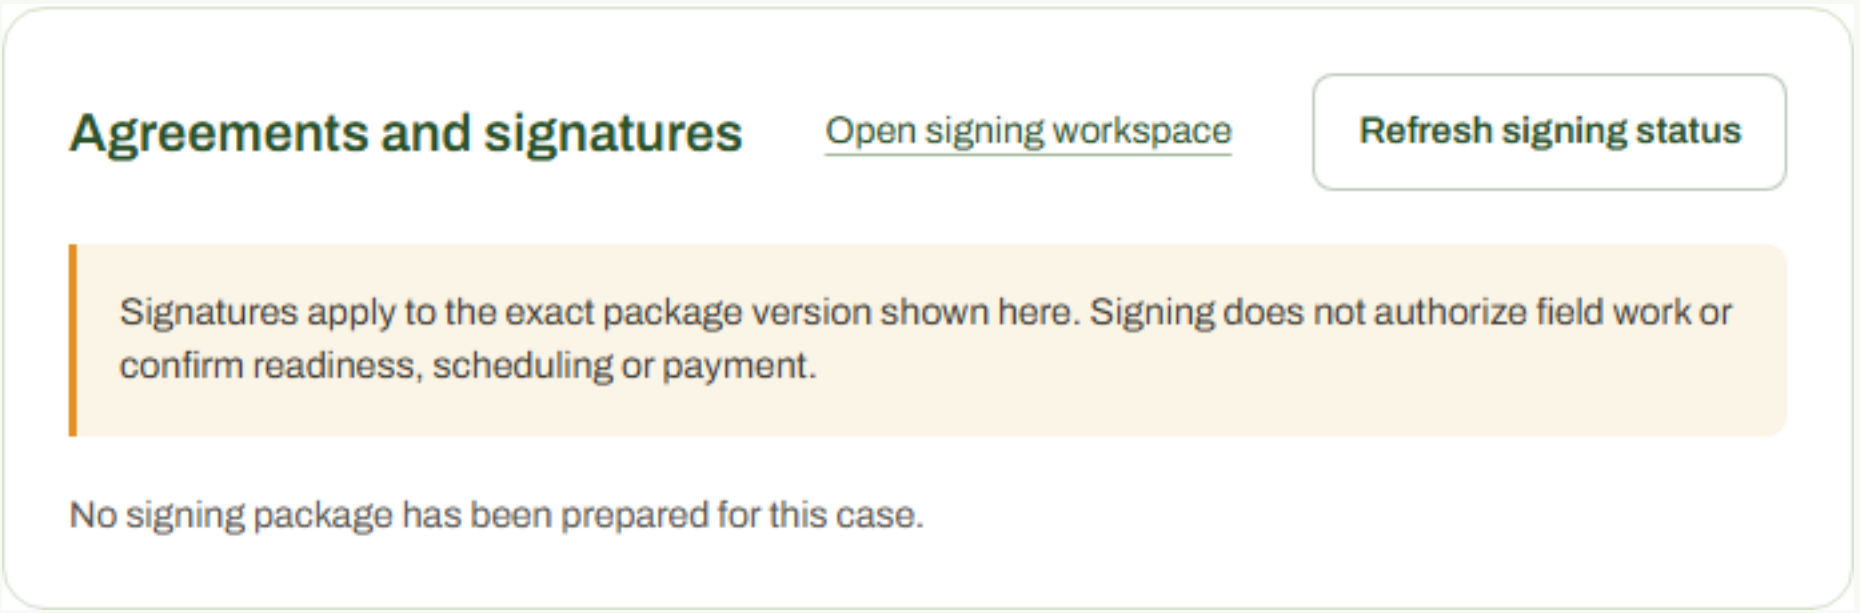

Signing availability and document review

Production electronic signing is enabled. In a real eligible case, the client reviews the exact saved document and completes explicit signing consent before the chosen officer countersigns. This DEMO case has no signing package and cannot create real signatures or grant property access or work authorization.

VIEW 151 / 180 | Jordan Ellis (DEMO) | TAS-2026-0094 | Client (simulated)

Signing 1: open your signing package

SIMULATION: In your own verified account, open My cases, select your case, then Signing. Staff must first prepare, approve and send the package. Choose Review documents to sign. This fictional preview represents that available state; cases 93 and 94 have no signing packages.

Source: Isolated local signing preview (simulated; not a production case)

2026-10-26T07:54:38.369Z | image part 1/1

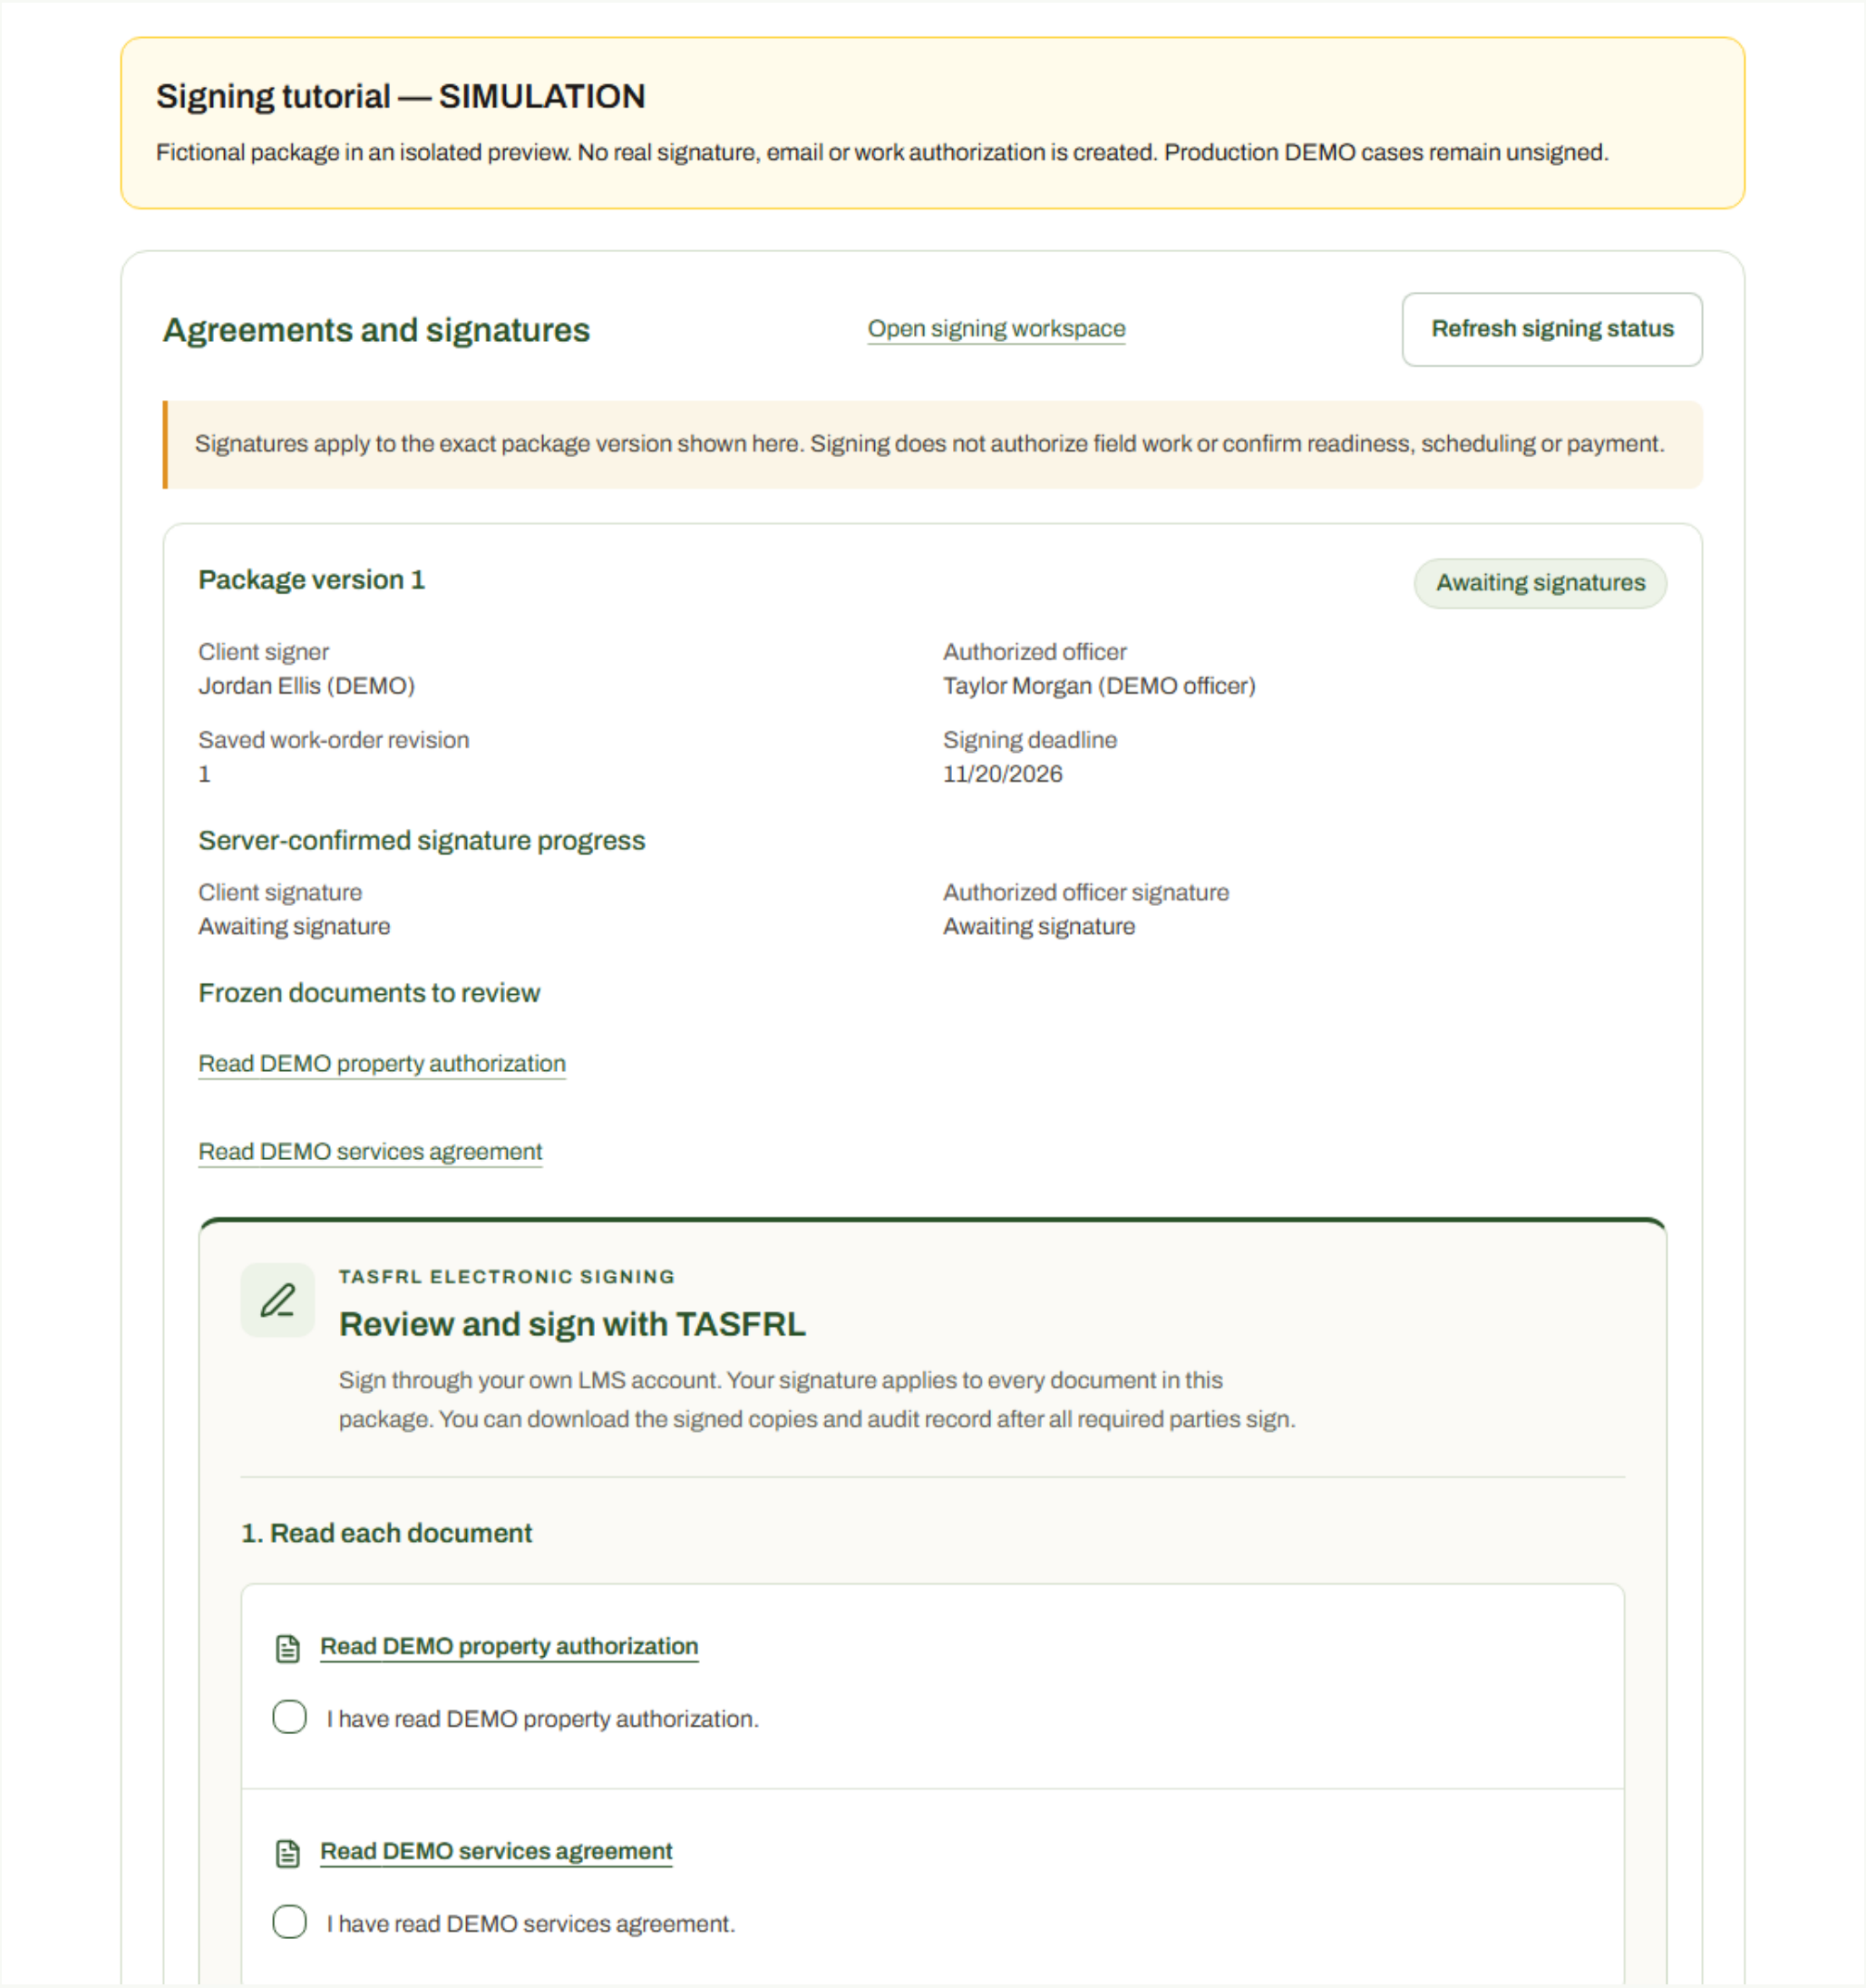

Signing 2: read and acknowledge every PDF

SIMULATION: Use each Read link to download and read the exact documents. Check I have read only after reviewing each one. Stop and ask your case lead about changes before signing; Cancel signing exits without recording a signature. The preview acknowledgements are simulated.

Source: Isolated local signing preview (simulated; not a production case)

2026-10-26T07:54:38.521Z | image part 1/2

Signing 2: read and acknowledge every PDF

SIMULATION: no real signature or completed case. Continued view 2 of 2. Same screen and capture time.

Source: Isolated local signing preview (simulated; not a production case)

2026-10-26T07:54:38.521Z | image part 2/2

2. Confirm your signature

I consent to use an electronic signature for this exact package. I have read every document listed, can download and keep a copy, and intend my typed name to be my signature on each document. I confirm I am the named signer and have authority to sign. I can stop before signing and contact my case lead to arrange another signing method.

Type your full name: Jordan Ellis (DEMO)

☐ I consent to electronic signing and intend this name to be my signature on all listed documents.

☐ I am the named client and have authority to sign for this property.

Policy: TASFRL-LMS-ESIGN-20261023-v1. This review expires at 4:04:38 PM. To use another signing method, cancel and contact your case lead.

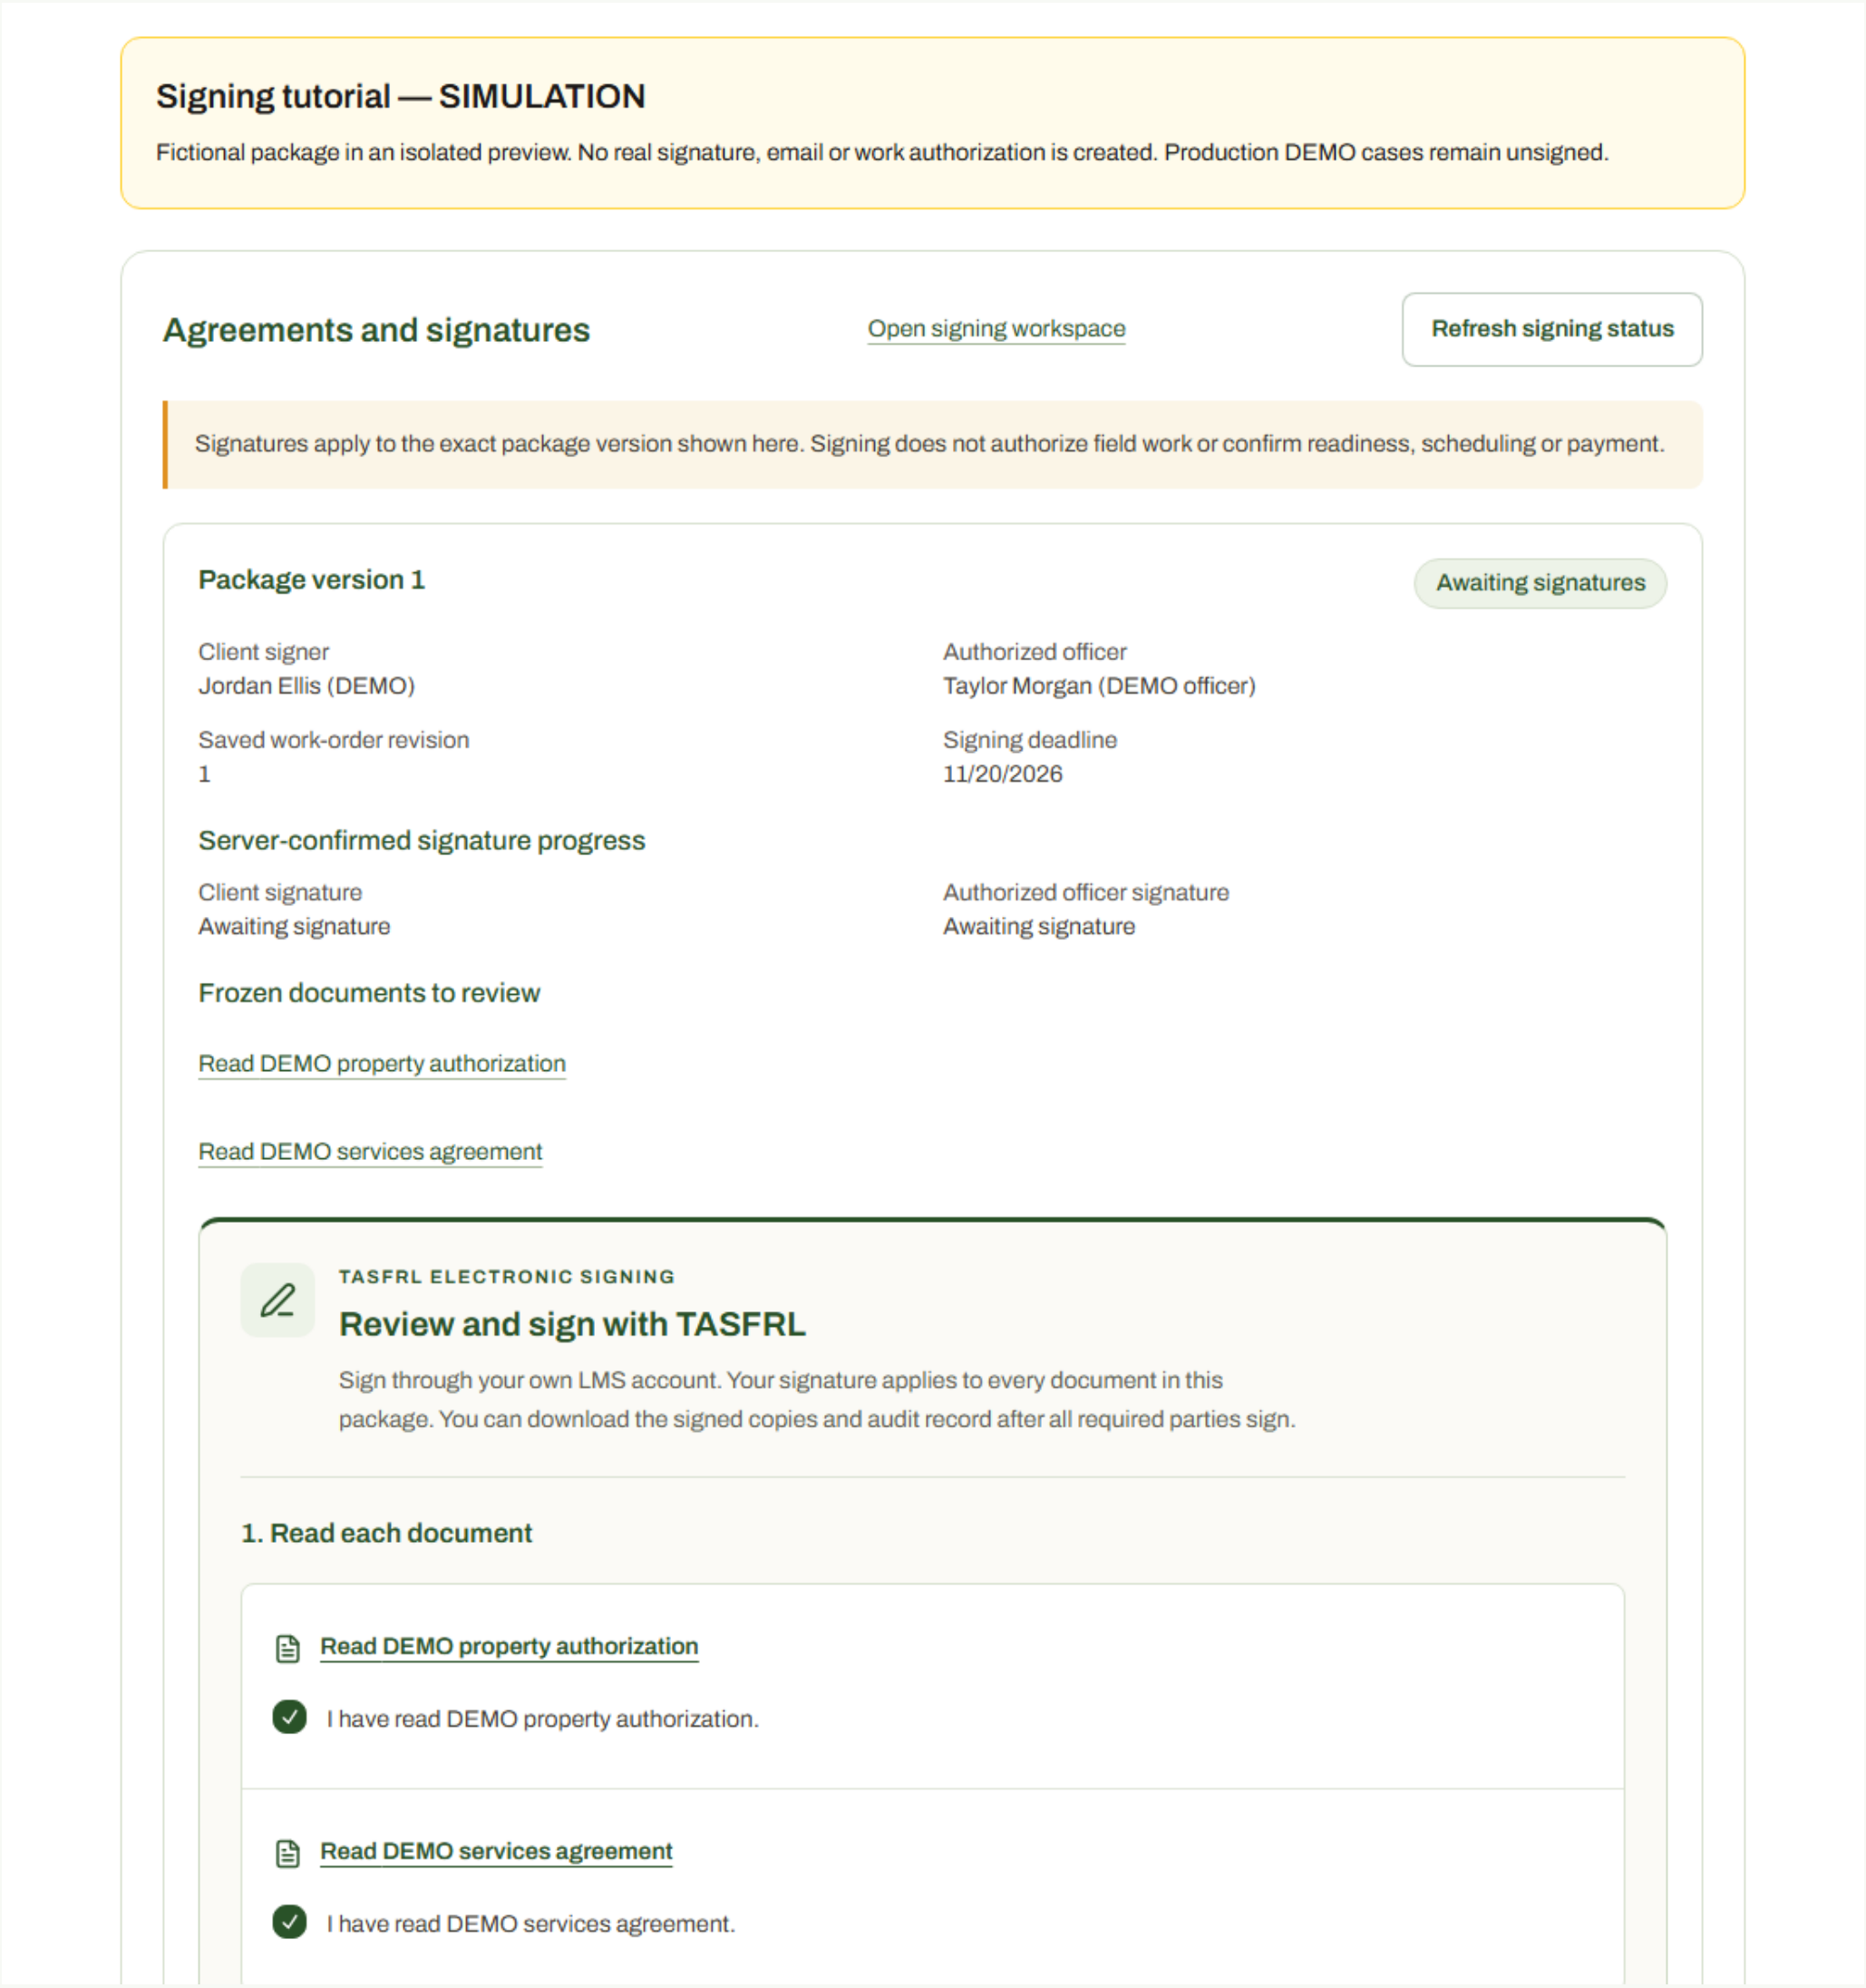

Sign all listed documents | Cancel signing

Signing 3: type your full name

SIMULATION: Type the full name displayed for your named signing account. The currently approved built-in flow uses a typed name; a drawing is not required. Do not sign from another person's account. This example uses a fictional DEMO identity.

Sign all listed documents | **Cancel signing**

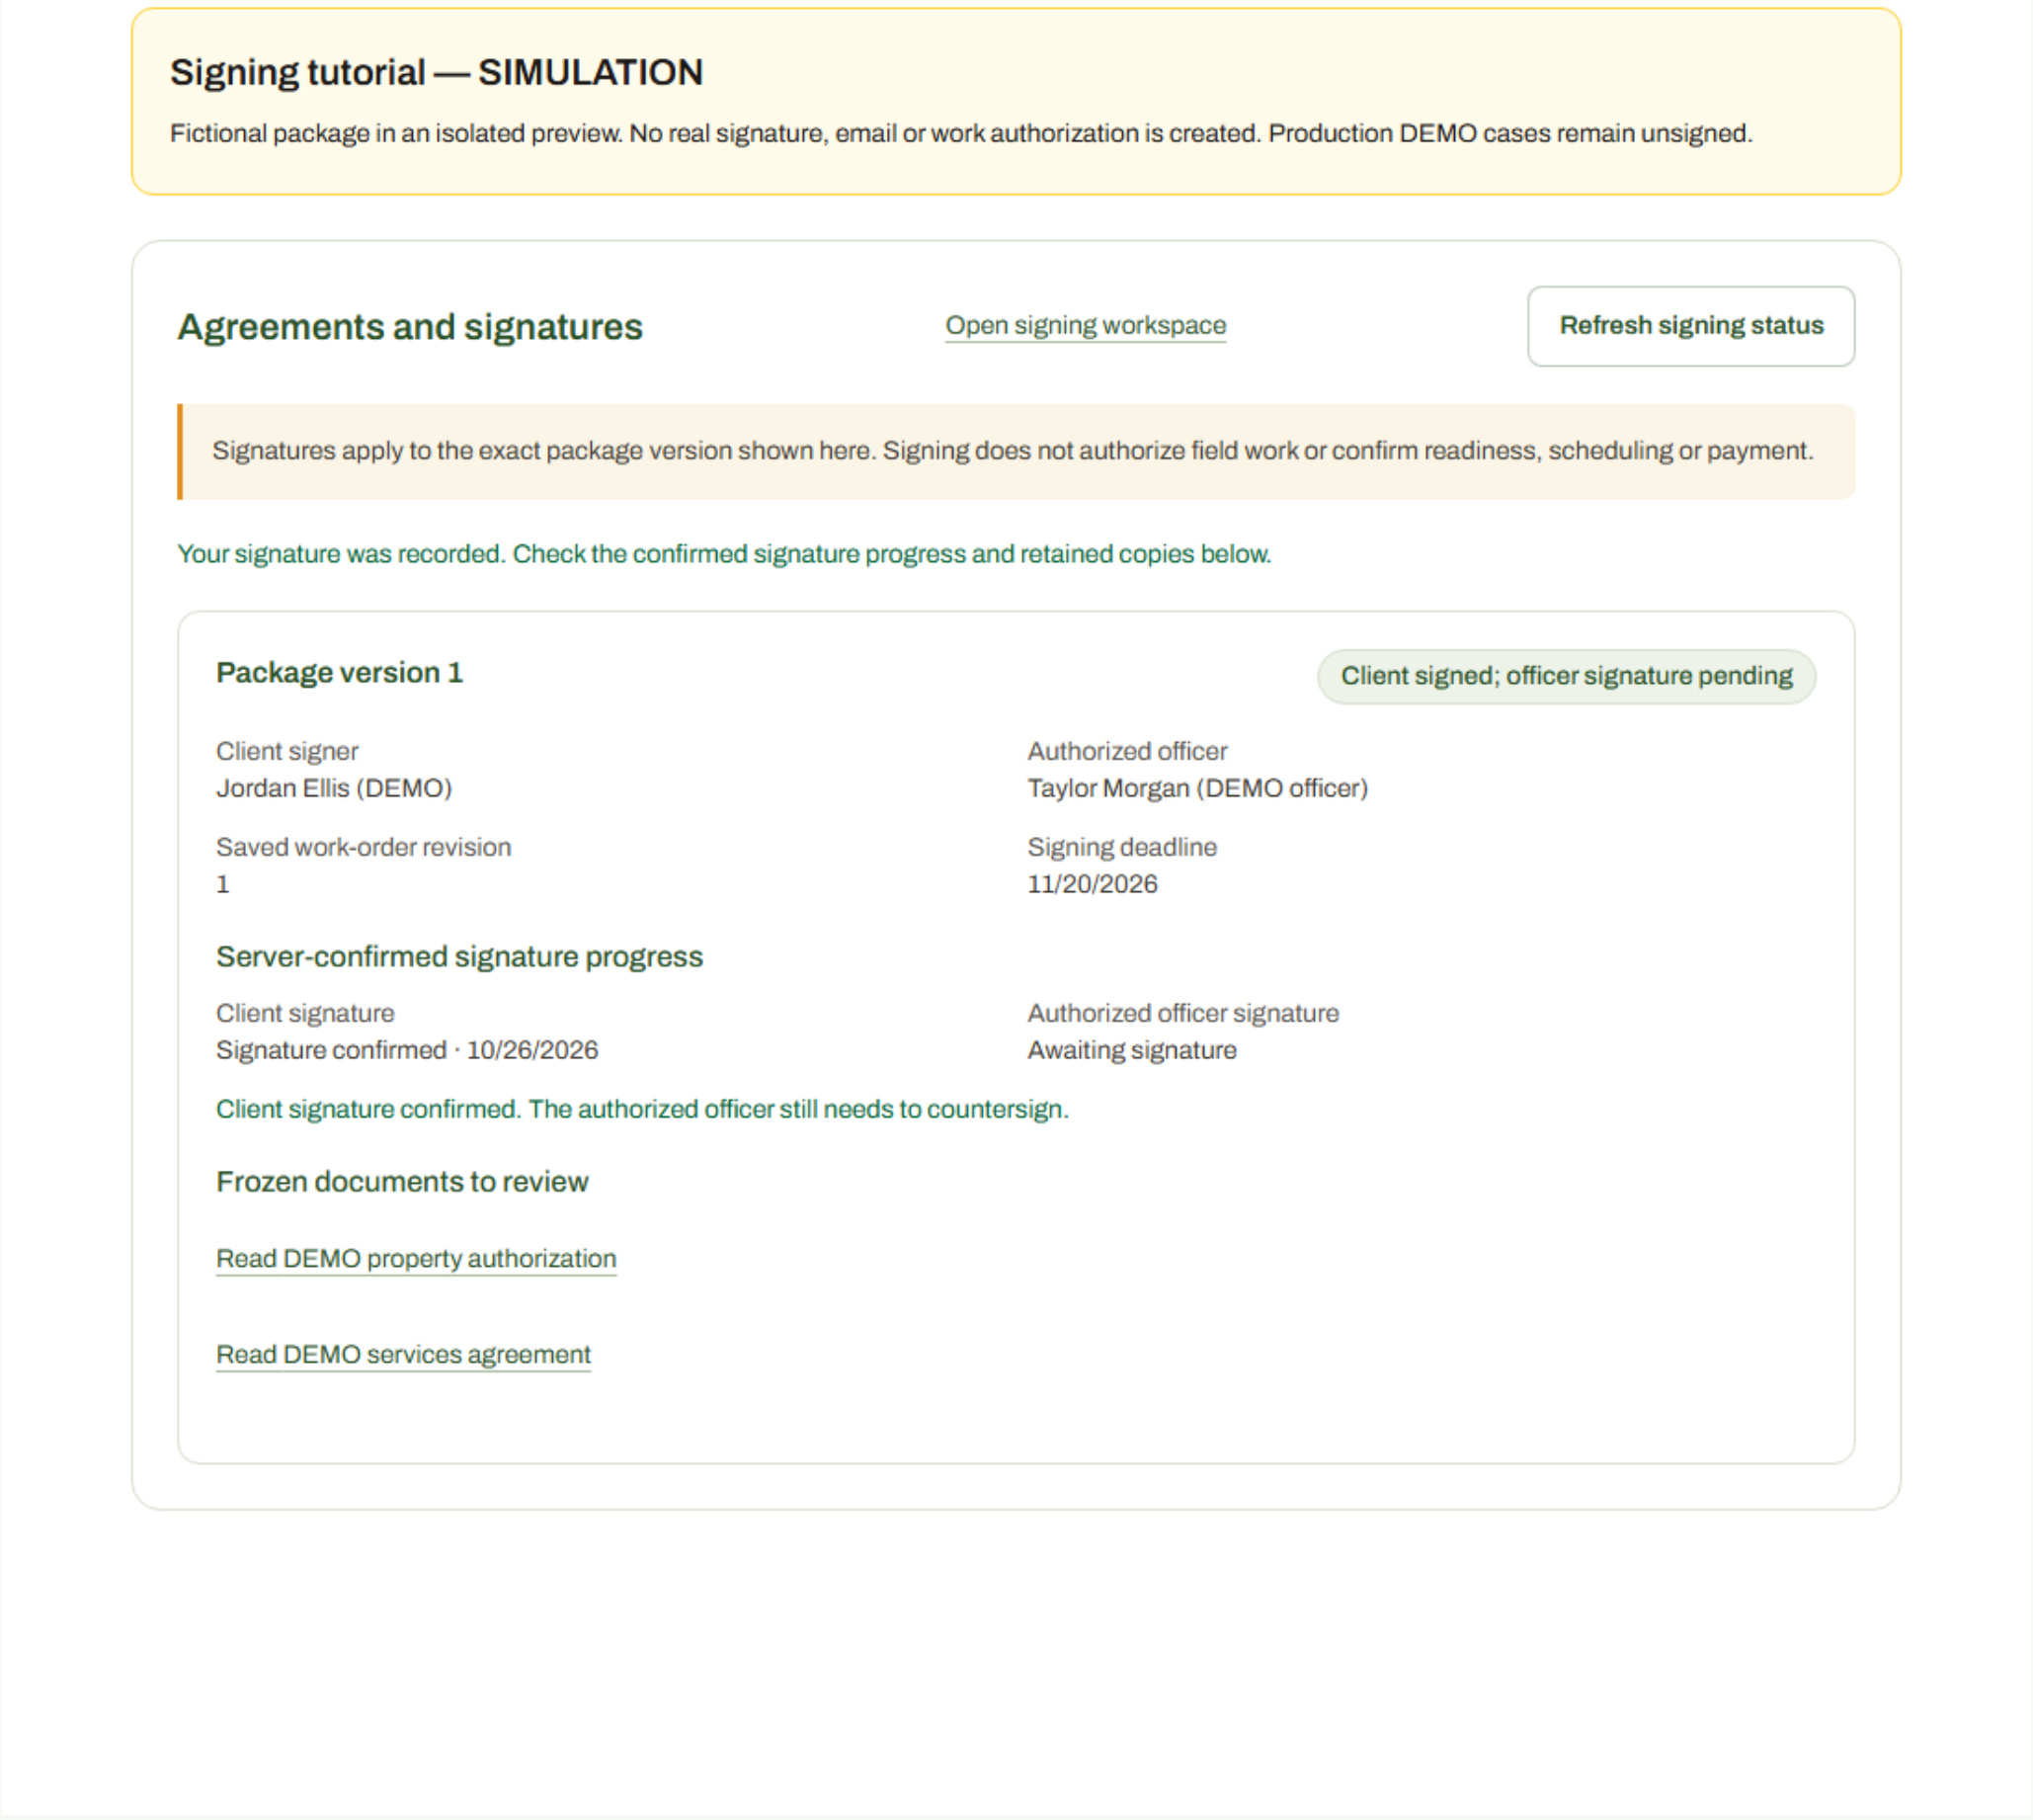

VIEW 155 / 180 | Jordan Ellis (DEMO) | TAS-2026-0094 | Client (simulated)

Signing 5: check confirmation and who signs next

SIMULATION: After submission, check the signature progress returned by the server. A real package waits for any required additional participants and then its named officer. A confirmation screen alone does not authorize field work. This is a mocked successful client response, not a retained signature.

Source: Isolated local signing preview (simulated; not a production case)

2026-10-26T07:54:38.981Z | image part 1/1

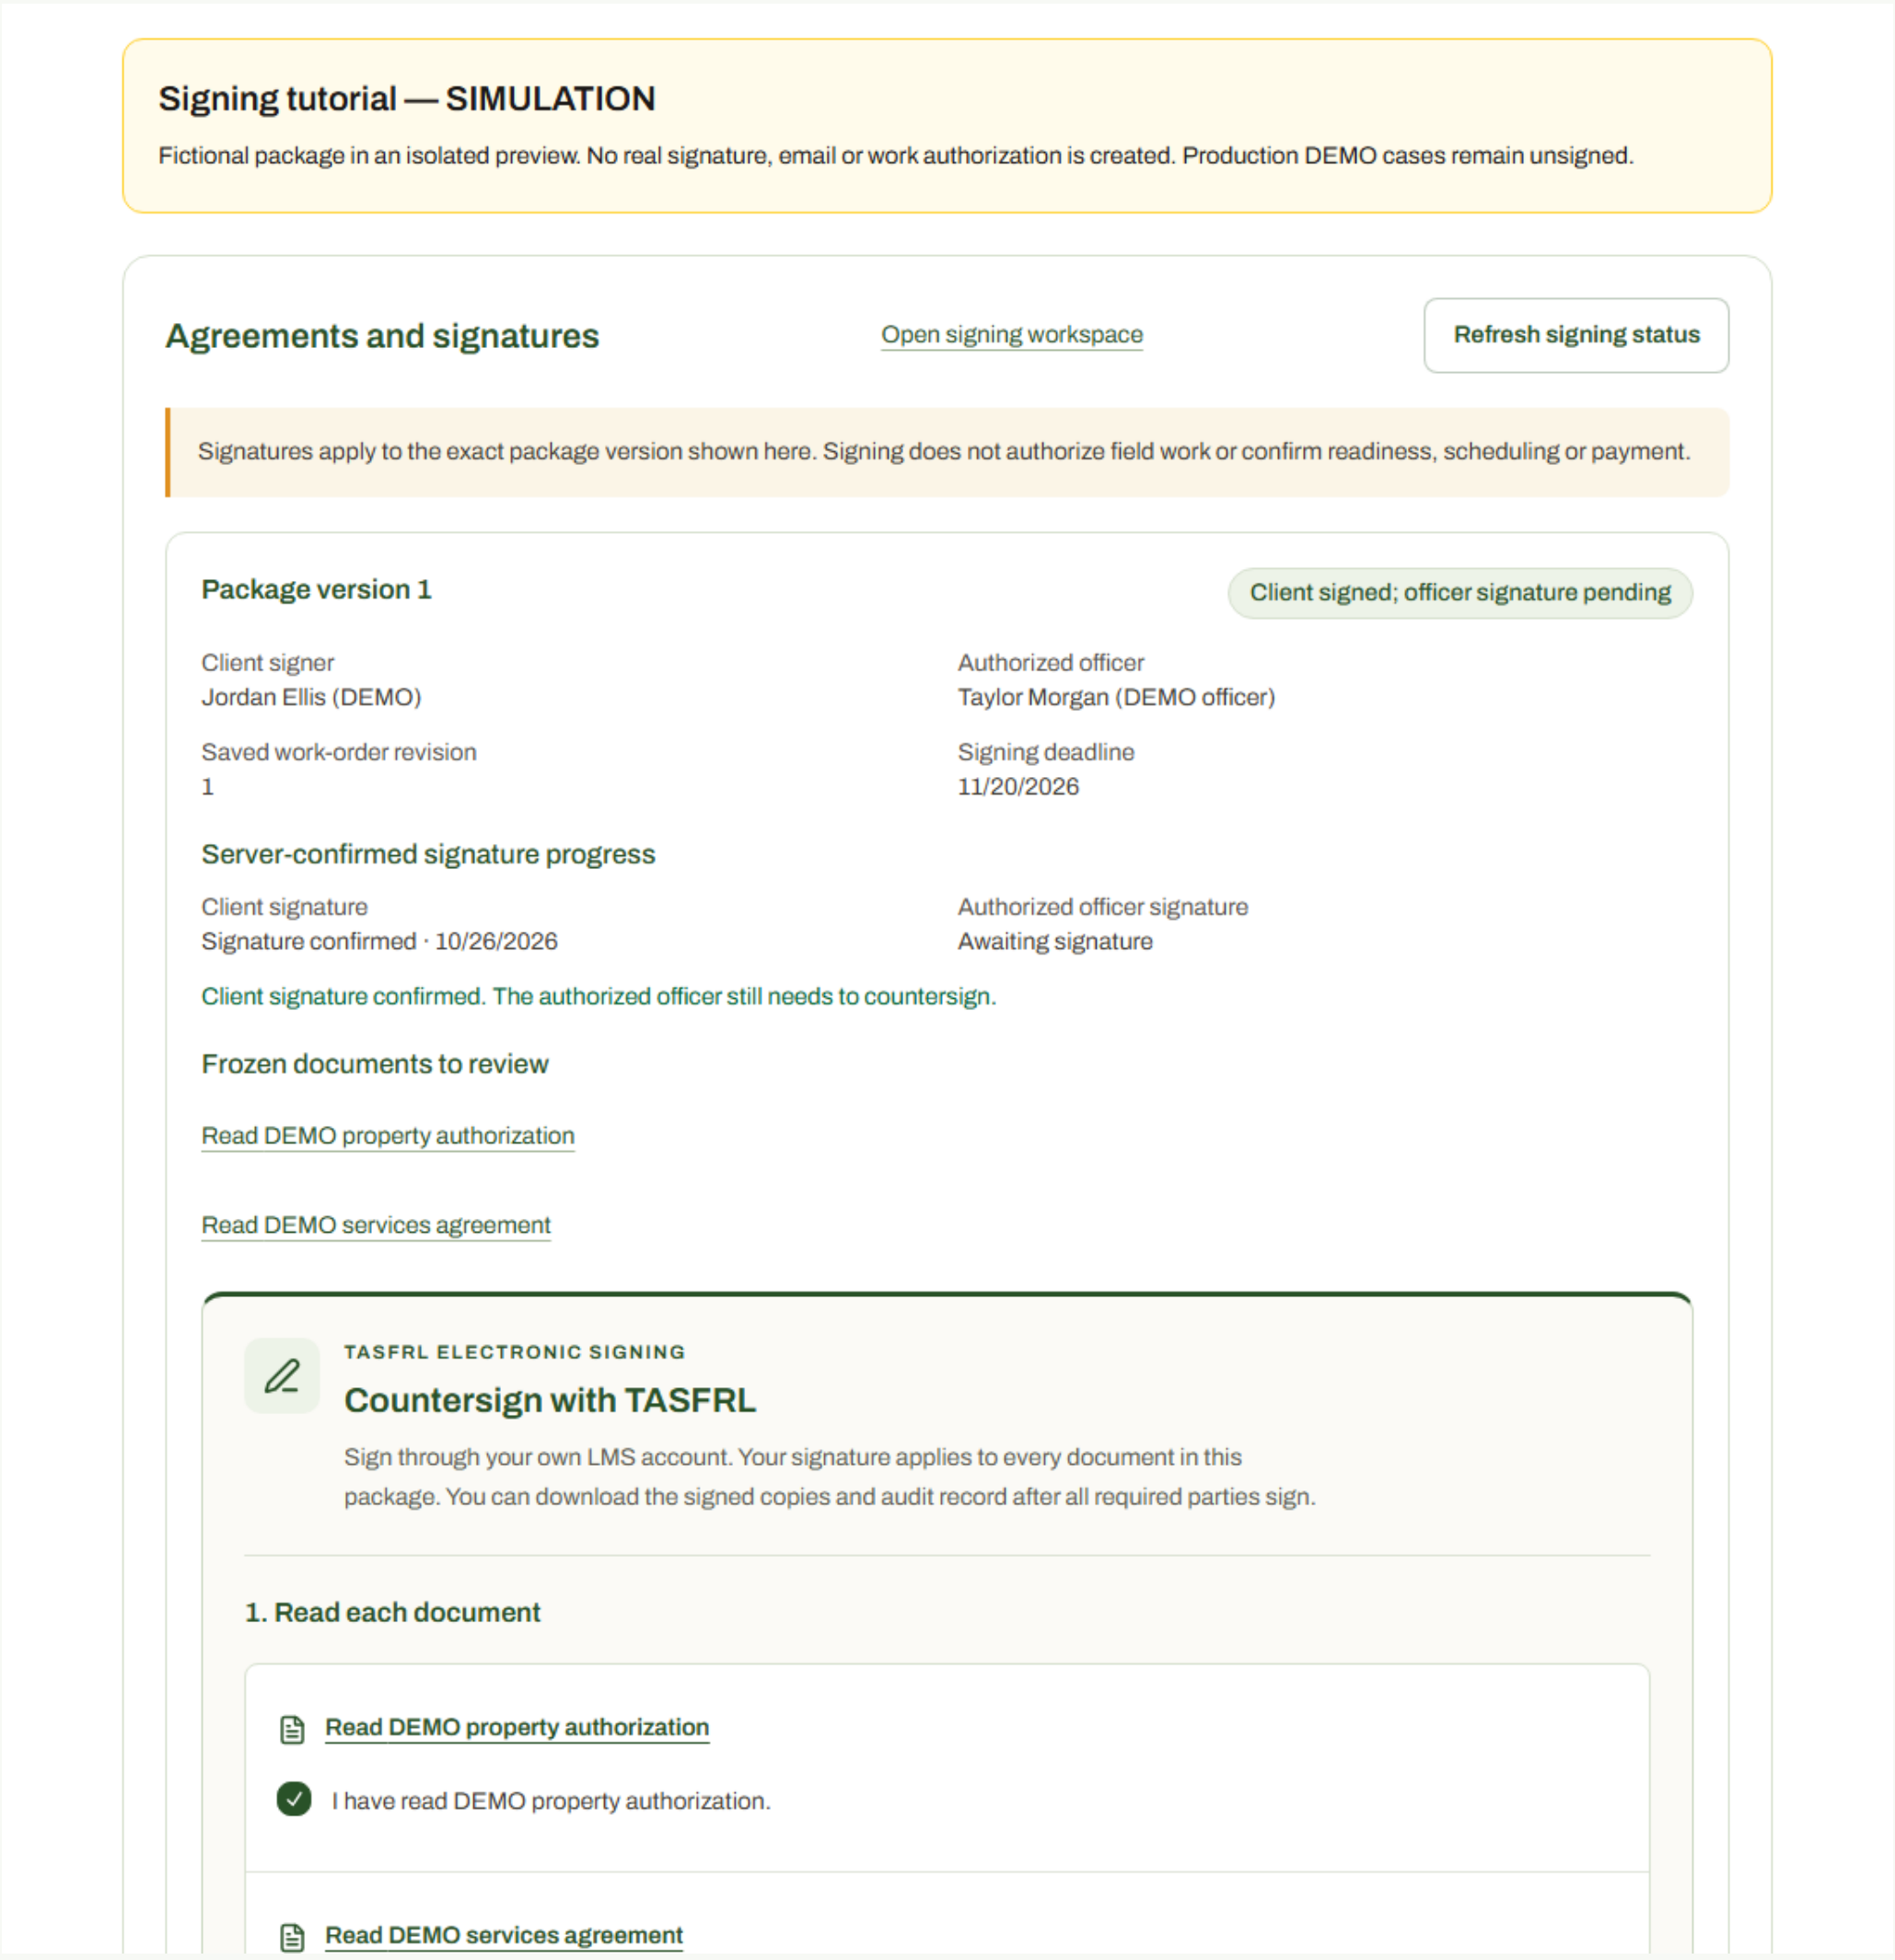

Signing 6: the named officer countersigns

SIMULATION: The selected authorized officer signs last through their own verified account, reviewing the same package and confirming current recorded authority. Additional required participants sign before the officer. This preview uses a fictional officer and simulates the step; it does not appoint an officer or grant authority.

Source: Isolated local signing preview (simulated; not a production case)

2026-10-26T07:54:39.820Z | image part 1/2

Risk Acknowledgment & Property Authorization

Acknowledgment of authority, normal land-management risks, and safety

Client / Land Steward	Jordan Ellis (DEMO)
Property	61 Learning Ln; Corridor C
Related Work Order / Date	WO-094 /

1. Property Authority & Information

Client confirms authority to permit the work and authorizes TASFRL and approved personnel to enter agreed work/staging areas; transport, load/unload, stage, and operate approved equipment/aerial systems; and create project maps, photos, aerial imagery/video, GPS data, and records. Client will disclose known boundaries, access limits, utilities/private facilities, structures, occupants, livestock, restrictions, and hazards.

2. Normal Land-Management Risks

Outdoor land work, equipment transport, drone services, and aerial application involve changing conditions. Even with reasonable care, work may leave or reveal ruts, disturbed soil, debris, drainage/access changes, vegetation regrowth, hidden objects, or other site variation. Weather, vegetation, wildlife, terrain, visibility, airspace, and access may affect results. Unless the Work Order states a specific deliverable, TASFRL does not guarantee a graded, engineered, erosion-free, maintenance-free, or biologically permanent result.

3. Safety & Hidden Conditions

Client will keep people, animals, vehicles, and personal property outside active work, staging, loading/unloading, and aerial areas and follow reasonable safety instructions. TASFRL may pause, relocate, modify, or stop work for unsafe, unlawful, unsuitable, out-of-scope, or undisclosed conditions, including unknown utilities, buried objects, contamination, unstable ground, disputed boundaries, or protected resources.

4. Shared Responsibility

Each party is responsible for matters within its reasonable control and for loss caused by its negligence, willful misconduct, material breach, or failure to perform an assigned responsibility. If both contributed, responsibility follows fault. Client should promptly report injury, damage, or a claimed deficiency and allow reasonable inspection before nonemergency repair when practical.

TASFRL will use reasonable care. Nothing in this acknowledgment limits responsibility for negligence, gross negligence, willful misconduct, fraud, or liability that cannot lawfully be limited.

By signing, Client confirms an opportunity to review the agreed work, property conditions, normal risks, and shared responsibilities and to ask questions before work begins.

Land Management Services Agreement

General terms for TASFRL land stewardship projects

Effective Date	2026-11-02
Client Legal Name	Jordan Ellis (DEMO)
Property / Primary Service Area	61 Learning Ln; Corridor C
Client Contact	lms-demo-jordan-20261019@lms-pilot.invalid

How this works: this Agreement sets the general relationship. Each project requires a signed Work Order showing the exact work, location, pricing, schedule, and special conditions. No field work is authorized until required project documents and readiness checks are complete.

1. How We Work Together

This Agreement is between Texas AgriForestry Small Farmers and Ranchers, a Texas nonprofit corporation doing business as Texas AgriForestry Small Farmers, Ranchers, and Landowners ("TASFRL"), and the Client identified above. Services are authorized only through signed Work Orders.

Agreement Documents include this Agreement, the applicable Work Order, Risk Acknowledgment, approved Change Orders, applicable specialized addenda, and any Rate Card revision identified in the Work Order. The Work Order controls project-specific scope, price, quantities, and schedule; specialized addenda control their subject; this Agreement controls general terms.

2. What TASFRL Will Do

TASFRL will perform authorized Services with reasonable care, using personnel, equipment, and practices reasonably suited to known conditions and scope. Services may include land clearing/forestry, access/trails, vegetation and pasture/timber improvement, habitat/firebreak/storm work, light excavation/drainage, precision agriculture/data, drone imaging/mapping, aerial product application, and other approved work.

TASFRL will maintain licenses, registrations, insurance, and qualifications required for services TASFRL directly performs and will follow applicable law, safety, FAA/airspace, transport, and product requirements when they apply. When a specialized service is performed by an independent contractor, that contractor remains responsible for its own licensing, certification, insurance, personnel, professional methods, and operational decisions under the applicable contractor and client agreements.

TASFRL will use reasonable care with nonpublic client/property information. Public promotion using identifiable client names, testimonials, property images, or aerial footage requires separate permission, except required grant, audit, insurance, or regulatory disclosure.

3. What We Need From You

Client will provide lawful authority, safe access/routes/staging areas suitable for planned equipment, and an authorized decision-maker; disclose known boundaries, utilities/private facilities, easements/restrictions, hazards, occupants/livestock, sensitive areas, and site/transport conditions; and keep people, animals, vehicles, and personal property outside active work areas.

Client is responsible for owner/access permissions, private utility locating, and property-owner permits unless the Work Order assigns a specific item to TASFRL. A site assessment records visible conditions and client-provided information; it is not a survey, engineering/environmental report, utility locate, or guarantee that every condition is found. Hidden conditions may require work to stop, move, or change.

4. Pricing, Scheduling & Changes

Work Order pricing may be fixed, time-and-equipment, per acre, unit price, estimated range, or another stated basis. It may separately state equipment, attachments, per-person labor, fuel/DEF, aerial systems, loaded movements, materials/products, disposal, permits, third-party costs, and other approved charges. Estimates may change with actual conditions unless fixed or not-to-exceed.

Unless stated otherwise, a heavy-equipment day includes up to 8 operating/meter hours. Field-equipment and aerial operations use at least a two-person team; TASFRL may require more for safety, terrain, acreage, product handling, regulation, site conditions, logistics, or complexity. Labor is billed per team member.

DEMO - FICTIONAL TRAINING RECORD - NOT FOR SIGNING OR WORK

Original Form 03: Services agreement - page 2 of 2

Rendered from the actual production download for Jordan's saved Form 03, version 1. Client fields name Jordan Ellis and the request belongs to TAS-2026-0094. The original page count is preserved; all pages are marked DEMO and signatures are blank. Optional instruments are training alternatives.

Source: /api/lms/cases/94/workflow/versions/fd2cc6b9-e4f1-49b3-a781-afbe9dd5a52d/pdf

2026-10-19T02:29:45.967Z | image part 1/1

Delivery and return are separate loaded movements. The loaded-movement rate may include normal TASFRL truck/trailer use, transport fuel, driver time, loading/unloading, securement, and scheduling. Machine operating fuel/DEF is separate unless included. Additional loads, mileage beyond the Rate Card local zone, special hauling, remobilization, and third-party transport may be separate.

Dates are estimates unless expressly stated otherwise. Weather, wildfire, soil, access, locates, permits, airspace, equipment, transport, staffing, supplies, and safety may require rescheduling. Material changes to scope, quantity, method/product, equipment/attachment, team size, transport plan, fuel/DEF basis, schedule, or price require a Change Order or clear electronic approval by authorized representatives.

Deposits are credited to the project and may be applied to reasonable actual or stated cancellation costs after TASFRL commits resources; any remainder is refunded. Invoices are due within 15 calendar days after the invoice date unless the applicable signed Work Order states another period. Undisputed amounts remain due. Taxes and governmental charges, disposal, permits, special insurance, and third-party/pass-through costs are separate unless the Work Order states otherwise; Client will provide applicable exemption documentation.

5. Results, Risk & Responsibility

Natural land and biological systems vary. Unless the Work Order states a specific performance standard, TASFRL does not guarantee vegetation mortality, no regrowth, exact mulch depth, appearance, drainage/erosion performance, crop/timber value, product efficacy, future property condition, survey-grade data, or complete aerial coverage. Client remains responsible for reasonable post-service maintenance and safe use.

The Risk Acknowledgment is part of each field project. Each party is responsible, to the extent permitted by law, for loss or third-party claims caused by its negligence, willful misconduct, material breach, or failure to perform assigned responsibilities. If both contributed, responsibility follows fault. Each party will maintain insurance reasonably appropriate to its operations/property; project-specific requirements may be stated in the Work Order.

Except for payment obligations, bodily injury, physical property damage, third-party claims, fraud, gross negligence, willful misconduct, or liability that cannot lawfully be limited, neither party is liable for indirect or consequential economic damages. Purely economic claims are capped at the amount paid or payable under the Work Order giving rise to the claim.

6. Pausing or Ending Work

Either party may end an unstarted Work Order by written notice subject to stated deposit/committed-cost terms. TASFRL may pause immediately for unsafe/unlawful conditions, undisclosed hazards, denied access, client interference, licensing/insurance deficiencies, or material nonpayment. If work has begun, Client will pay for authorized work and reasonable committed project costs through the stop date.

7. Resolving Concerns & General Terms

The parties will first try to resolve concerns directly and, if needed, through mediation before suit unless immediate action is reasonably necessary. Texas law governs; unless otherwise agreed or required by law, venue is a court serving Nacogdoches County, Texas.

The signed Agreement Documents are the complete agreement. Changes must be written or clearly documented electronically by authorized representatives. If one provision is unenforceable, the rest remain effective. Electronic signatures are permitted; neither party may bind the other without authority.

TASFRL may offer Community Stewardship, grant-supported, subsidized, or payment arrangements consistent with its mission, Board-approved criteria, funding, and grant requirements. Approved pricing must be shown in or incorporated by the Work Order. Reduced pricing does not reduce safety/disclosure duties or create a right to future pricing; direct out-of-pocket costs are not automatically discounted unless funded or approved.

Agreement Acceptance

By signing, the parties confirm a shared expectation of clear communication, reasonable care, accurate property information, respect for safety, and good-faith problem solving. Project-specific work is authorized only through a signed Work Order.

Project Work Order

Project scope, pricing, schedule, and authorization

Work Order No. / Date	Case 94 / v1 / _____
Client / Property	Jordan Ellis (DEMO) / 61 Learning Ln
TASFRL Project Lead	_____

Services & Deliverables

- ☐ Forestry mulching / brush clearing
- ☐ Vegetation / pasture / timber improvement
- ☐ Trenching / light excavation / drainage
- ☐ Drone imaging / video / mapping
- ☐ Other: _____
- ☐ Trail / access opening
- ☐ Habitat / firebreak / storm work
- ☐ Precision agriculture / field data
- ☐ Aerial product application - Addendum required
- ☐ Prescribed-burn preparation & Contractor Coordination*

*Separate burn-contractor agreement required for burn operations

Work Area / Boundaries	Corridor C; DEMO map C
Acreage / Quantity / Deliverable	1.5 acres; access route; photos
Equipment / Method / Attachment	Tractor, brush attachment and hand tools
Exclusions / Hold Points	No digging, spraying, burning or tree removal

Site & Schedule

Access / Route / Staging	Gate C; existing trail; staging inside gate
Known Site / Safety Conditions	North creek buffer; possible private utilities
Mobilization Window / Duration	3 Nov 2026; one crew shift
Planned Team / Loaded Movements	Team: _____ Delivery: _____ Return: _____ Other: _____

Pricing

Description	Qty / Days / Hrs	Rate	Amount
Equipment / aerial system	6	$150	$900.00
Attachment(s)		$	$
Team labor	12	$40	$480.00
Loaded movement / mileage	2	$150	$300.00
Fuel / DEF	1	$120	$120.00
Materials / product / third-party / other	1	$200	$200.00

Rate Card / Revision	SAMPLE-RATES-2026-01
Deposit / Due Date	$500.00 / _____
Estimated Total / NTE	$2000.00 ☑ Not-to-exceed $2000.00
Payment Terms / Special Pricing	USD 500 deposit; USD 1,500 balance

Authorization

This Work Order authorizes only TASFRL-performed services and pricing stated above, subject to the Services Agreement, Risk Acknowledgment, applicable Rate Card, and approved Change Orders. If TASFRL coordinates an independent prescribed-burn contractor, that contractor remains separately contracted and responsible for burn operations under its own landowner agreement and burn plan.

Change Order

Authorization for a material project change

Change Order No. / Date	Case 94 / v1 / _____
Work Order No.	WO-094
Client / Property	Jordan Ellis (DEMO) / 61 Learning Ln

What Is Changing

Change to Scope / Area / Deliverable	Add 0.25 acre north of Area A
Equipment / Method / Staffing / Transport	
Materials / Product / Fuel / Other	
Reason for Change	Extra area requested

Effect on Price and Schedule

Price Change	☑ Increase ☐ Decrease ☐ No change Amount: $200.00
Revised Project Total / NTE	$2200.00
Schedule / Duration Change	Half-day extension
Other Terms / Attachments	Map C, revision 2

Only the changes stated here are authorized. All other Agreement and Work Order terms remain in effect.

Approval

By signing, the parties approve the changes above. Work outside the approved change is not authorized unless separately documented.

Project Completion & Client Feedback

Closeout, follow-up, and land steward feedback

Work Order No. / Completion Date	WO-094 / 2026-11-06
Client / Property	Jordan Ellis (DEMO) / 61 Learning Ln
Services / Deliverables Completed	1.5 acres; access route; photos
Open / Follow-Up Items	Follow-up required: Review regrowth
Post-Service Instructions	Keep vehicles off soft ground
Supporting Record / Photo / Map Ref.	Map C; field record 13
Incident / Damage Report Ref. (if any)	

Land Steward Review

Please review the visible work and identify any concern so TASFRL can discuss, inspect, and, when appropriate, address work that materially misses an express Work Order requirement. Signing records the project condition at completion and does not waive a concern that could not reasonably have been identified then.

- ☐ **Work appears complete with no current concerns**
- ☐ **Complete subject to listed follow-up items**
- ☐ **I have a concern I would like TASFRL to review**

Client Comments / Follow-Up	
TASFRL Response / Next Step	Case lead to call client / 2026-11-20

Feedback may be used internally to improve services. Public use of the client name, testimonial, identifiable property images, or aerial footage requires separate permission.

Aerial Application Addendum

Client authorization for aerial product application

Use only when the Work Order includes aerial dispensing or application of a product. Aerial imaging/data capture alone does not require this addendum unless the Work Order says otherwise.

Project & Product

Work Order / Property	61 Learning Ln
Product / Material / Purpose	Not selected - preview only
Target Area / Estimated Acreage	Area C; 0.5 acre
Application Rate / Quantity	Pending applicator review
Buffers / No-Apply Areas	Pending approved site plan
Weather / Wind / Timing Limits	Application on hold
Reentry / Grazing / Harvest / Use Limits	

Sensitive Areas / People

- ☐ **Residences / roads / public areas**
- ☐ **Bees / apiaries / livestock / aquaculture**
- ☐ **Power lines / towers / airports / airspace**
- ☐ **Neighboring crops / gardens / organic areas**
- ☐ **Water / wetlands / habitat**
- ☐ **Other:** _____

Key Responsibilities

- TASFRL will use qualified personnel and proceed only when applicable legal, licensing, insurance, product, weather, airspace, equipment, and safety requirements are satisfied. TASFRL may postpone, modify, or cancel when conditions make the application unlawful or imprudent.
- Client will identify sensitive areas and occupants, provide lawful access, and follow applicable reentry, grazing, harvest, storage, use, and post-application instructions. Applicable law, product directions, and manufacturer instructions control over inconsistent client instructions.
- Coverage, efficacy, plant response, and complete absence of off-target movement cannot be guaranteed because conditions and product limitations vary; this does not excuse negligent application or violation of applicable requirements.

Authorization

By signing, Client authorizes the aerial application described above and confirms the sensitive-area and use information provided is accurate to the best of Client's knowledge. TASFRL will maintain required operational/application records in its project file.

Media, Event & Project Story Permission

Optional permission for photography, video, audio, project/event stories, and approved public use

Optional. This permission is voluntary and is not required to receive TASFRL services, participate in a TASFRL program, or attend a TASFRL event.

Participant / Land Steward Jordan Ellis (DEMO)

Project / Event Case 60 demonstration

Date / Location 2026-11-03; Nacogdoches

Relationship ☐ Client/Land Steward ☐ Event Participant ☐ Volunteer/Trainee ☐ Partner/Presenter ☐ Other: Client

Permission Level & Authorized Users

☐ I authorize media capture and selected public uses below.

☐ I do not consent to intentional photo/video/audio recording of me.

☐ TASFRL

☐ Specific authorized contractor/partner: TASFRL case staff

☑ Internal/project records only - no public use.

☐ TASFRL and authorized contractors/partners supporting this project/event

Example: Lone Star Wildland Fire Management, LLC (LSWFM)

Media / Information & Approved Uses

☐ Photographs / before-and-after images

☐ Audio / voice recording

- ☐ Name / organization name
- ☐ General project or event story / stewardship outcomes
- ☐ TASFRL website / social media
- ☐ Presentations / training / outreach
- ☐ Optional grant / donor / funder communications
- ☐ Printed / digital program materials

☐ Video recording

☐ Aerial imagery / video

- ☐ Written or recorded quote / testimonial
- ☐ Other: Property photographs
- ☐ Authorized contractor/partner website / social media
- ☐ Educational or partner communications
- ☐ News / media / public-relations communications
- ☑ Do not show exact address / sensitive location details

Permission Terms

I authorize TASFRL and any TASFRL-authorized contractor or partner identified or permitted above to photograph, video or audio record, and use the selected materials in connection with the identified TASFRL project, program, or event. I grant a nonexclusive, royalty-free permission to reproduce, edit, crop, caption, display, publish, and distribute the selected materials for the approved uses. Authorized contractors/partners may use the materials only for approved TASFRL-related purposes and may not use them for unrelated commercial advertising, endorsement, or marketing without separate written permission. TASFRL and authorized users will not intentionally publish an exact street address or sensitive property location unless separately approved or required. No payment is owed for approved use. I may withdraw permission for future use by written notice; materials already published, distributed, or incorporated into completed materials may not be practically retractable.
